Vascular Tumors and Malformations of the Ocular Fundus J.J. de Laey, M. Hanssens, 2012-12-06 This report for the Belgian Ophthalmological Society concerns a number of fundus diseases which most ophthalmologists only rarely encounter Still it is of importance that they should be able to recognize them not only because most of these eye diseases are treatable when they are diagnosed early enough but also because they are sometimes associated with major visceral and neurological problems The ophthalmologist may be the first practitioner to suspect a von Hippel Lindau s disease or a neurofibromatosis He should realize at that moment that his role is not only to treat the eyes but also to advise his patient refer him to other specialists and consider the genetical implications of his diagnosis

Clinicopathologic correlations are of great importance and we felt that it was necessary to emphasize the histopathological aspect of these diseases A report has to overview the literature on a specific topic The literature on vascular tumors of the fundus is extremely vast and even if we tried to be as complete as possible we must confess that we did not cite every author who published on such cases A third aspect which was considered as important was to provide sufficient clinical and histopathologic examples of the various disease which are reviewed We are indebted to a large number of friends who kindly authorized the publication of their material In particular we wish thank Prof A Brini Strasbourg Dr D de Wolff Rouendaal Leiden Prof P **Current Catalog** National Library of Medicine (U.S.),1985 First multi year cumulation covers six years 1965 70

intro to point slope form algebra video khan academy - Aug 22 2023

the point slope form is very useful when you don't have your y intercept it is used to write equations when you only have your slope and a point point slope form $y - y_1 = m(x - x_1)$ for example your slope m is 3 and your point a, b is $(9, 10)$ you would substitute your y coordinate for a and your x coordinate for b
