Atlas Of The Universe Insiders:

Atlas: A 25-year Insider Story Of The Lhc Experiment Peter Jenni, Fridolin Dittus, 2019-05-21 This book is written by the ATLAS Collaboration at CERN's Large Hadron Collider LHC to document and reflect on its more than 25 years of history. It covers all aspects of this global science project at the forefront of particle physics. The historical part recalls first the early stages of discussions in the community leading to the formation of the collaboration in 1992. In a unique approach the second part documents the evolution from early detector concepts to the final instrument covering the technical, financial, and human aspects. This includes the phases of construction of detector components in the various institutes around the world as well as their installation and commissioning in the underground cavern at CERN. An important part is devoted to the operation of the whole experiment. The book highlights the capabilities and physics accomplishments so far, including the Higgs boson discovery jointly announced with CMS. It features the various aspects of a broad spectrum of activities needed to arrive at the physics results. The book includes also an outlook to the detector upgrade activities preparing the experiment for the high luminosity LHC phase of the next decades. Last but not least, it reveals the human aspects of the large ATLAS community working together pursuing common physics goals. The book is aimed at a broad readership with interest in large science projects and their history as well as in the human endeavour of a worldwide collaboration.

The Trinity Is the Matrix Gary D. Combs, 2021-04-12 Solved are two great mysteries: science's search to understand the grand unified theory of everything and Christianity's search to understand the Lord's omnipresent nature, both of which are the exact same thing only clothed in different terminology. Thus making the Big Bang Theory and the Theory of Evolution both Biblical principles as first recorded in the Genesis account of creation written by Moses some 3,500 years ago.

The Cosmos Jay M. Pasachoff, Alex Filippenko, 2019-07-11 Explains the fundamentals of astronomy together with the hottest current topics in this field such as exoplanets and gravitational waves.

The Insider P. V. Narasimha Rao, 2000 Novel set against the contemporary political situation in India.

Decoding Spacetime Eric Carlson, 2010-11-08 This is a book about science, religion, and being yours and mine. The study of being is called Ontology. Our culture is dominated by a naturalist ontology. The question is: does ontology include a supernatural component? Or is that idea a relic of our primeval past, sort of like appendix and adenoids, parts that can be excised from the body of our belief system? The author argues for the primacy of the transcendent supernatural ontology by means of two books: the book of nature and the book of transcendence, the Bible, each containing its own portion of the evidence. Mr. Carlson argues for the following: The universe represents a small portion of God's ontology; a small reality devoted to redemption. The signet of redemption is the number 7; its appearance within chronology is deliberate, instructive, and compelling. The Creation Week account reflects a two-fold metaphor: 1. space-time

itself was created to support the redemptive act and 2 mankind's history will unfold in a series of seven ages later quantified as millennia. The interval between Adam and Abraham literally filled one redemptive bi-millennium but the catastrophic effects of 3 realities: the Cainite civilization, Noah, and the break up of Pangaea contribute to the appearance of myth as viewed by the uniformitarian geologist for whom catastrophes appear invisible. The 2nd bi-millennium, Abraham to Messiah, was also fulfilled exactly in redemptive time. The termination of our age is imminent and dependent upon the chronology of Israel, mankind's chronograph. A detailed chronology of the history of Israel is flavored with the redemptive signet, especially 70 yrs or 70 heptads of yrs. By decoding Israel's history in redemptive time and employing the single concept of the favor of God, the author derives a Biblical-based proof that modern Israel is the same and identical state founded by Samuel in 1096 BC. Three independent proofs of this foundational date are provided. These proofs show that the Monarchy existed for exactly 511 yrs, which period is exactly equal to 73 heptads. Israel is an heptadic state. The author concludes that the redemptive corollary to Israel's ontology is also proven: we have actually entered the end times and the events associated with the last days will soon unfold. Because the reality of Israel is visible to all, it is apparent that the redemptive offer made to mankind is also real and visible, such as that appearing in John 3:16, John 6:40, and Romans 10:9-13. There is much to learn about our world. Start now. Tomorrow may be too late.
