Atmospheric Halos Antarctic Research Series:

Atmospheric Halos Walter Tape, 2013-03-15 Published by the American Geophysical Union as part of the Antarctic Research Series Volume 64 Archdeacon Stuck was seeing halos formed in moonlight Their daytime counterparts are surprisingly common not only in the arctic but in temperate climates as well Many halos are possible forming arcs of colored or white light almost anywhere in the sky Their occasional brilliance variety and exotic shapes have impressed skywatchers for centuries This book introduces halos and tries to convey some of their beauty It tells much of what is known about them how they arise how so many are possible and why some are rare while others occur every few days or so No such insights of course are necessary for the enjoyment of a halo display indeed an elaborate display is one of Nature's wonders Nevertheless understanding can add to enjoyment especially since the makings of a great display turn out to be as remarkable as the display itself

Encyclopedia of the Antarctic Beau Riffenburgh, 2007 Publisher description [The Cinema of Nuri Bilge Ceylan](#) Bülent Diken, Graeme Gilloch, Craig Hammond, 2017-12-02 Film maker Nuri Bilge Ceylan's meditative visually stunning contributions to the New Turkish Cinema have marked him out as a pioneer of his medium Reaping success from his prize winning breakout film *Uzak* 2002 and from later festival favourites *Once Upon a Time in Anatolia* 2011 and *Winter Sleep* 2014 he has quickly established himself as an original and provocative writer director and producer of 21st century cinema In an age where Turkey's modernisation has created societal tensions and departures from past tradition Ceylan's films present a cinema of dislocation and a vision of nostalgia understood as homesickness sick of being away from home sick of being at home This book offers an overdue study of Ceylan's work and a critical examination of the principle themes therein In particular chapters focus on time and space melancholy and loneliness absence rural and urban experience and notions of paradox as explored through films which are often slow and uncompromising in their pessimistic outlook Moving on from the tendency to situate Ceylan's oeuvre exclusively within the canon of New Turkish Cinema one of this book's major achievements is also to assess the influence of classic European thought literature and film and how such a notably minimal and in many ways nationally specific approach translates to an increasingly transnational context for film This will prove an important book for film students and scholars and those interested in Turkish visual culture

Cirrus David K. Lynch, Kenneth Sassen, David O'C. Starr, Graeme Stephens, 2002-01-24 Cirrus clouds are high thin tropospheric clouds composed predominately of ice In the last ten years considerable work has shown that cirrus is widespread more common than previously believed and has a significant impact on climate and global change As the next generation weather satellites are being designed the impact of cirrus on remote sensing and the global energy budget must be recognized and accommodated This book the first to be devoted entirely to cirrus clouds captures the state of knowledge of cirrus and serves as a practical handbook as well Each chapter is based on an invited review talk presented at Cirrus a meeting hosted by the Optical Society of America and co sponsored by the American Geophysical Union and the American Meteorological Society

All aspects of cirrus clouds are covered an approach that reaches into diverse fields Topics include the definition of cirrus cirrus climatologies nucleation evolution and dissipation mixed phase thermodynamics crystallinity orientation mechanisms dynamics scattering radiative transfer in situ sampling processes that produce or influence cirrus and vice versa contrails and the influence of cirrus on climate

Light Scattering Reviews 3 Alexander A. Kokhanovsky,2008-08-22 This is the 3rd volume of a Light Scattering Reviews series devoted to current knowledge of light scattering problems and both experimental and theoretical research techniques related to their solution This volume covers applications in remote sensing inverse problems and geophysics with a particular focus on terrestrial clouds The influence of clouds on climate is poorly understood The theoretical aspects of this problem constitute the main emphasis of this work

South Pole Elizabeth Leane,2016-04-15 As one of two points where the Earth s axis meets its surface the South Pole should be a precisely defined place But as Elizabeth Leane shows in this book conceptually it is a place of paradoxes An invisible spot on a high featureless ice plateau the Pole has no obvious material value yet it is a highly sought after location and reaching it on foot is one of the most extreme adventures an explorer can undertake The Pole is as Leane shows a deeply imagined place and a place of politics where a series of national claims converge Leane details the important challenges that the South Pole poses to humanity asking what it can teach us about ourselves and our relationship with our planet She examines its allure for explorers such as Robert F Scott and Roald Amundsen not to mention the myriad writers and artists who have attempted to capture its strange inhospitable blankness She considers the Pole s advantages for climatologists and other scientists as well as the absurdities and banalities of human interaction with this place Ranging from the present all the way back to the ancient Greeks she offers a fascinating and lavishly illustrated story about one of the strangest and most important places on Earth

The Haunted Observatory Richard Baum,2007-06-05 For many centuries observers of the night sky interpreted the moving planets and the surrounding starry realms in terms of concentric crystalline spheres in the center of which hung the Earth the hub of creation But with the discoveries of Galileo Copernicus Kepler and Newton astronomers were suddenly struck by a momentous truth the solar system was neither small nor intimate but extended an unfathomable distance toward countless even more distant stars The endless possibilities of these astounding developments fired scientists imaginations leading both to further discoveries and to flights of fancy While newly discovered facts are important and interesting the quaint curiosities and spectral ghosts that led scientists astray have a fascination of their own This is the subject of astronomer Richard Baum in this elegant narrative about the mysteries and wonders of celestial exploration The fabled mountains of Venus a city in the moon ghostly rings around Uranus and Neptune bright inexplicable objects seen near the sun and the truth behind Coleridge s Star dogged Moon in his famous poem about the Ancient Mariner these are just some of the intriguing twists and turns that astronomers took while investigating our starry neighbors Baum vividly conveys the romance of astronomy at a time when the vistas of outer space were a new frontier and astronomers guided only by

imagination and analogy set forth on uncharted seas and were haunted for a lifetime by marvels both seen and imagined

Hope, Utopia and Creativity in Higher Education Craig A. Hammond, 2017-01-12 Reappraising ideas associated with Ernst Bloch Roland Barthes and Gaston Bachelard within the context of a utopian pedagogy Hope Utopia and Creativity in Higher Education reframes the transformative creative and collaborative potential of education offering new concepts tactics and pedagogical possibilities Craig A Hammond explores ways of analysing and democratising not only pedagogical conception knowledge and delivery but also the learning experience and processes of negotiation and peer assessment Hammond shows how the incorporation of already existent learner hopes daydreams and creative possibilities can open up new opportunities for thinking about popular culture and memory learning and knowledge and collaborative communities of support Drawing together theoretical and cultural material in a teaching and learning environment of empowerment Hammond illustrates that formative articulations of alternative utopian futures across sociological humanities and education studies subjects and curricula becomes possible *Antarctic Bibliography* Stuart G. Hibben, 1997 **Constantine** Timothy D. Barnes, 2013-11-13 Drawing on recent scholarly advances and new evidence Timothy Barnes offers a fresh and exciting study of Constantine and his life First study of Constantine to make use of Kevin Wilkinson's re dating of the poet Palladas to the reign of Constantine disproving the predominant scholarly belief that Constantine remained tolerant in matters of religion to the end of his reign Clearly sets out the problems associated with depictions of Constantine and answers them with great clarity Includes Barnes own research into the marriage of Constantine's parents Constantine's status as a crown prince and his father's legitimate heir and his dynastic plans Honorable Mention for 2011 Classics Ancient History PROSE award granted by the Association of American Publishers
