Current Membership of the Joint Committee on Atomic Energy United States. Congress. Joint Committee on Atomic Energy,1975 **Current Membership of the Joint Committee on Atomic Energy, Congress of the United States** United States. Congress. Joint Committee on Atomic Energy,1966 National Library of Medicine Current Catalog National Library of Medicine (U.S.),1965 *Nuclear Science Abstracts* ,1955 **Newsletter** United States. Department of State,1965 The International Atomic Energy Agency and World Nuclear Order Lawrence Scheinman,2016-03-17 The International Atomic Energy Agency has had a leading responsibility in preventing the spread of nuclear weapons and misuse of materials intended for nuclear energy across the world Originally published in 1987 in the wake of the Chernobyl disaster of 1986 which proved the utmost importance of the agency Scheinman explores the function of the IAEA and the challenges it faced This report also lists ways that the agency could be strengthened touching on topics such as leadership roles support for safeguarding functions and prevention from the agency being overwhelmed by international and national political issues This title will be of interest to students of Environmental Studies **A Directory of Information Resources in the United States: Physical Sciences, Biological Sciences, Engineering** National Referral Center for Science and Technology (U.S.),1965 *Plutonium, Power, and Politics* Gene I. Rochlin,2024-06-14 In the early 1970s the major industrial states were preparing to shift to nuclear fission as their principal source of electrical power But that change has not occurred In part this is due to a growing public recognition that techniques and institutions for management of spent nuclear fuel separated plutonium and long lived radioactive wastes are not yet fully developed The consequent pressures for resolution have spurred a series of often ill defined and sometimes contradictory attempts to promote international cooperation and control of hazardous activities How are these varied suggestions to be compared and evaluated By what criteria can plans be selected that are likely to be both effective and negotiable In this study Gene I Rochlin physicist and social scientist explores the technical political and institutional aspects of international nuclear export and fuel cycle policies He categorizes existing proposals and suggests way to develop new ones that better promote both national and international goals Dr Rochlin argues neither for nor against the use of nuclear power or plutonium fuels Instead he addresses the question of how international arrangements could be reached that might jointly satisfy the objective of the several key nations yet not be too difficult to negotiate He concludes that a major fault has been the tendency to improvise arrangements for specific technical or industrial operations As a result overall social and political goals have become the bargaining points for compromise Yet attempts to simultaneously resolve all problems are unlikely to prove fruitful Dr Rochlin suggests instead the formation of institutions organized around more limited social political and technical objectives even at the expense of excluding some nations or omitting some aspects of the nuclear fuel cycle Only by so doing he argues can immediate agreements be reached

that preserve the potential for more comprehensive future arrangements without sacrificing industrial environmental or nonproliferation goals This important book will be of interest to scientists social scientists government officials and others concerned with the problems of plutonium management and nuclear wastes This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979 **National Library of Medicine Catalog** National Library of Medicine (U.S.),1960
