Around And Around And Around:

The Student's Journal ,1889 The Handbook of Cross-Border Ethnic and Religious Affinities Charity Butcher,2019-04-16 Increasingly ethnic and religious variables are taken into account to explain conflict and relations between nations However ethnic and religious groups exist beyond the confines of frontiers In Africa for example hundreds of ethnic groups were divided by colonial borders and many retained kinship connections to their brethren in other countries thus creating cross border ethnic religious affinity Such cross border connections affect a variety of foreign policy from diplomacy to the use of force An internal problem can spread to other states or external actors can become involved in domestic disputes due to such factors Therefore data on cross border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict This unique resource serves both qualitative and quantitative researchers For ease of use it is divided in sections for each region of world with the entries organized by pairs of contiguous countries Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current connections between these groups The entries are organized based on the Correlates of War country codes which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data *A Functional Grammar of Gooniyandi* William B. McGregor,1990-01-01 This volume sets out to provide a comprehensive description of the grammar of Gooniyandi a non Pama Nyungan language of the southern central Kimberley region of Western Australia It covers phonetics and phonology word phrase and clause structure and the semantics of closed class grammatical items The major focus is however on meaning how do Gooniyandi speakers mean with and in their language To this end the theoretical framework of systemic functional grammar particularly as elaborated in Halliday s recent work is adopted Certain refinements to the theory are proposed in order to better account for the Gooniyandi evidence Of obvious importance to those studying Australian aboriginal languages this work has an importance to a wider audience for its effective presentation of theory justification Titanium Alloys for Biomedical Implants and Devices Hooyar Attar,Damon Kent,2021-02-11 This special issue provides a current snapshot of recent advances and ongoing challenges in the development of titanium alloys for biomedical implants and devices Titanium offers significant advantages over other materials including higher strength and better biocompatibility This issue highlights current trends and recent developments including the uptake of additive manufacturing 3D printing and approaches to improve processing and performance of titanium alloys for medical applications Families at Play Sinem Siyahhan,Elisabeth Gee,2018-02-02 How family video game play promotes intergenerational communication connection and learning Video games have a bad reputation in the mainstream media They are blamed for encouraging social isolation promoting violence and creating tensions between parents and children In this book Sinem Siyahhan and Elisabeth Gee offer another view They show that video games can be a tool for connection not isolation creating opportunities for families to

communicate and learn together Like smartphones Skype and social media games help families stay connected Siyahhan and Gee offer examples One family treats video game playing as a regular and valued activity and bonds over Halo A father tries to pass on his enthusiasm for Star Wars by playing Lego Star Wars with his young son Families express their feelings and share their experiences and understanding of the world through playing video games like The Sims Civilization and Minecraft Some video games are designed specifically to support family conversations around such real world issues and sensitive topics as bullying and peer pressure Siyahhan and Gee draw on a decade of research to look at how learning and teaching take place when families play video games together With video games they argue the parents are not necessarily the teachers and experts all family members can be both teachers and learners They suggest video games can help families form develop and sustain their learning culture as well as develop skills that are valued in the twenty first century workplace Educators and game designers should take note *Ten Lectures on Applied Cognitive Linguistics* John Taylor,2018-03-20 A series of 10 lectures on various aspects of Cognitive Linguistics as these relate to matters of language teaching and learning Topics addressed include the role of categorization the nature of rules the encyclopaedic scope of semantics spatial expressions metaphor and metonymy nouns and nominals tense and aspect and the theoretical status of the phoneme
