German Art History and Scientific Thought
 Mitchell B. Frank, 2017-07-05 A fresh contribution to the ongoing debate between Kunstwissenschaft scientific study of art and Kunstgeschichte art history this essay collection explores how German speaking art historians of the late nineteenth and early twentieth century self consciously generated a field of study Prominent North American and European scholars provide new insights into how a mixing of diverse methodologies took place in order to gain a more subtle and comprehensive understanding of how art history became institutionalized and legitimized in Germany One common assumption about early art historical writing in Germany is that it depended upon a simplistic and narrowly defined formalism This book helps to correct this stereotype by demonstrating the complexity of discussion surrounding formalist concerns and by examining how German speaking art historians borrowed incorporated stole and made analogies with concepts from the sciences in formulating their methods In focusing on the work of some of the well known fathers of the discipline such as Alois Riegl and Heinrich Wölfflin as well as on lesser known figures the essays in this volume provide illuminating and sometimes surprising treatments of art history's prior and understudied interactions with a wide range of scientific orientations from psychology sociology and physiognomics to evolutionism and comparative anatomy

Heidegger and the Work of Art History
 Amanda Boetzkes, 2017-07-05 Heidegger and the Work of Art History explores the impact and future possibilities of Heidegger's philosophy for art history and visual culture in the twenty first century Scholars from the fields of art history visual and material studies design philosophy aesthetics and new media pursue diverse lines of thinking that have departed from Heidegger's work in order to foster compelling new accounts of works of art and their historicity This collected book of essays also shows how studies in the history and theory of the visual enrich our understanding of Heidegger's philosophy In addition to examining the philosopher's lively collaborations with art historians and how his longstanding engagement with the visual arts influenced his conceptualization of history the essays in this volume consider the ontological and ethical implications of our encounters with works of art the visual techniques that form worlds how to think about things beyond human centred relationships the moods dispositions and politics of art's history and the terms by which we might rethink aesthetic judgment and the interpretation of the visible world from the early modern period to the present day

Art,

History, and Postwar Fiction Kevin Brazil, 2018-10-18 Art History and Postwar Fiction explores the ways in which novelists responded to the visual arts from the aftermath of the Second World War to the present day. If art had long served as a foil to enable novelists to reflect on their craft, this book argues that in the postwar period novelists turned to the visual arts to develop new ways of conceptualizing the relationship between literature and history. The sense that the novel was becalmed in the end of history was pervasive in the postwar decades. In seeming to bring modernism to a climax whilst repeating its foundational gestures, visual art also raised questions about the relationship between continuity and change in the development of art. In chapters on Samuel Beckett, William Gaddis, John Berger, and W. G. Sebald, and shorter discussions of writers like Doris Lessing, Kathy Acker, and Teju Cole, this book shows that writing about art was often a means of commenting on historical developments of the period: the Cold War, the New Left, the legacy of the Holocaust. Furthermore, it argues that forms of postwar visual art, from abstraction to the ready-made, offered novelists ways of thinking about the relationship between form and history that went beyond models of reflection or determination. By doing so, this book also argues that attention to interactions between literature and art can provide critics with new ways to think about the relationship between literature and history beyond reductive oppositions between formalism and historicism, autonomy and context.
