Reflections on War is a comprehensive and objective investigation into the problems of war The book explores the crucial link between theory strategy and objectives in war taking all the evidence and theory into account and should be of interest to military practitioners specialists in defence studies and others interested in military history Also notable about the work is its ability to draw insights together from international legal theory management sciences history sociology and the political economy of war showing due respect for the moral complexities involved in waging war **Puritan Islam** Barry A. Vann, 2011-09-27

In this unique analysis of Muslim population shifts in the Western world geographer Barry A Vann provides fresh insights into the theological factors that play into these demographic trends Vann examines the imagined geographies of Muslims with a puritan orientation

People with this mind set are little inclined to accept a pluralistic multicultural live and let live concept of society And conflicts between conflicting value systems are almost inevitable Vann notes that this purist approach to Islam is certainly not universal among Muslims and there are many varying interpretations that are more moderate in outlook Nonetheless the undeniable theological background of all Muslim communities colors their values and attitudes and must be taken into consideration when attempting to understand the potential conflicts between contiguous Muslim and non Muslim groups Given the fact that the population of Muslim immigrants is growing in traditionally Christian and increasingly secular countries of the Western world while the resident populations are either stagnant or declining Vann s insightful analysis of the ways in which Islam influences perceptions of community and geography is of great relevance The British National Bibliography Arthur James Wells,1996
