Astray And The Shelter Dogs:

Astray and the Shelter Dogs Katy McDermott, 2015-05-15 A Place to Call Home That's all that shelter dogs want At the heart of the early reader book suitable for ages 8 is Astray a puppy who once heard himself referred to as a stray and now thinks that's his name His best friends are Buster a tough little poodle and Johnny a high class whippet You'll also get to know Mick a nasty seeming pit bull who doesn't realize how much he needs a home until it's almost too late The dogs cooperate to help him find one using a plan concocted by little Astray Will Mick find his home And the others too What about Astray himself Find out in Astray and the Shelter Dogs

The Ekistics of Animal and Human Conflict Rishi Dev, 2016-09-01 Urban wildlife management is a town planning subject It is logical and important to relate the animal and human conflict seen all over the world as a phenomenon which is applicable to all types of human settlements despite the diversities and complexities of cultures societal structures laws value systems religions and so on A universal principle or theory governs and applies to all cities which define these conditions and phenomena creating the conflict or coexistence This book investigates the niches of one of the key urban animals from a syntactic semantic and pragmatic perspective and explores how these niches are naturally synonymous to similar patterns structures and compositions within human settlements It explores and defines the demographic patterns thresholds and phenomenon which leads to formation of the different levels and extremes of interaction between the species This forms a paradigm which classifies this conflict within the various disciplines and frameworks of urban ecology The focus is primarily on urban dogs it being a keystone species but is later related with other urban animals as well The premise for this approach is that history has shown how certain species have persuasively coexisted with humans for so many millennia yet a conflict happens between animals and humans and within humans over animals It is thus logical to believe that the forces which create this conflict cannot solely be natural to the species in question and have to come from outside from the settlement patterns of both species and the net resultant force and dynamics The book looks at these dichotomies in four distinct but interrelated ways It delves deep inside four niches which form the dynamics of any settlement spatial cultural ecological and economic and explores all scales at which the succession and evolution of animals take place in highly urbanized settlements

situations Humans have relied on dogs for tracking but formal search dog training significantly advanced in the late 20th century This book uniquely blends scientific rigor with compelling narratives offering a balanced perspective on these remarkable animals The book begins by establishing fundamental concepts about canine olfaction then moves into a detailed overview of training methodologies and case studies It culminates with a discussion of the ethical considerations and the future of the field Rescue Dogs emphasizes the continued importance of investing in and supporting rescue dog programs ensuring this critical resource remains available when disaster strikes
