

# Asymptotic Analysis *of* Differential Equations

Revised Edition

Roscoe B White

Imperial College Press

A phase plane plot illustrating the asymptotic analysis of differential equations. The plot is divided into two horizontal regions: a dark grey upper region and an orange lower region. A vector field of small line segments is shown throughout, indicating the direction of flow. Several trajectories are drawn as solid lines, showing how they approach and then diverge from a central point. The trajectories in the upper region curve upwards and to the right, while those in the lower region curve downwards and to the right. The overall appearance is that of a saddle point or a similar critical point where trajectories are attracted to the horizontal axis and repelled from the vertical axis.
