AT-Index Winka Dubbeldam, Archi-Tectonics, 2006 Publisher description *Strange Objects, New Solids and Massive Things* Winka Dubbeldam, 2022-01-05 The object as solid having three dimensions is not just a different formal trend but a paradigm shift a reconceiving of how the architectural object is produced and experienced changing the very concept of objectivity and meaning of architecture This book celebrates the potential of the strange object which finds its origin in the proto space the moment between the becoming of the idea and the ultimate shape it takes the state of the still obscure and uninhibited object outside the established framework of signification As seen through an examination of 10 projects by Archi Tectonics this strange object is proof of the very capacity of the object to generate new habits and meanings For close to a century modernism was the norm presented to culturally aware citizens as the expression of modern life It arrived hand in hand with medical advances mass standardization and a shared ideal of what the ease and speed of the modern lifestyle could offer Only in the early years of the 21st century did our widespread allegiance begin to shift away from modernism and towards a new social realm The digital revolution introduced online societies niche cultures and digital design Digital manufacturing facilitated opportunities of surface patterning and the fabrication of one off special building components removing the constraints of standardization in the construction industry and celebrating the experimental Testing designs through prototypes allows for a much more informed decision making process The focus is on precise rigorous research and development rather than representational models Now after nearly two decades of implementing digital tools we have reached a new platform where digital design and robotic production are the norm and by extension digital craft and integral design are as the future This has been particularly important in the rethinking of advanced digital design processes As showcased and examined in *Strange Objects New Solids and Massive Forms* from the earliest projects and regardless of scale Archi Tectonics has valued performance over form design intelligence over style Through prototypes and mock ups process documentation and testimonials the book presents 10 current and recent projects that celebrate the particular and singular over the ideal and universal With Contributions of Manuel DeLanda Jonathan Jackson *Pulsation in Architecture* Eric Goldemberg, 2012 *Pulsation in Architecture* highlights the role of digital design as the catalyst for a new spatial sensibility related to rhythmic perception It proposes a novel critical reception of computational architecture based on the ability of digital design to move beyond mere instrumentality and to engage with core aspects of the discipline the generative engine of digital architecture reinvigorates a discourse of part to whole relationships through the lens of rhythmic affect There is a paradigm shift in spatial perception due to the intense use of computational techniques and the capacity to morph massive amounts of data in spatial patterns rhythm plays a pivotal role in the articulation of the topology of buildings generating the atmospheric character that induces moods and throbbing sensations in space *Pulsation* introduces the fundamental animate capacity of living form and reshapes our perception of architectural space across the multiple scales of

a project from digital inception to fabrication An emerging thread of rhythmic sensibility loosely binds a survey of contemporary design practices including contributions by Peter Eisenman Jeff Kipnis Greg Lynn UNStudio Preston Scott Cohen Reiser Umemoto Asymptote Ali Rahim Hernan Diaz Alonso Ruy Klein Gage Clemenceau NOX Evan Douglass Studio kokkugia and MONAD Studio

Architecture, Media, and Memory Joel McKim, 2018-12-13 Architecture Media and Memory examines the wide range of urban sites impacted by September 11 and its aftermath from the spontaneous memorials that emerged in Union Square in the hours after the attacks to the reconstruction at Ground Zero to vast ongoing landscape urbanism projects beyond Yet this is not simply a book about post 9 11 architecture It instead presents 9 11 as a multifaceted case study to explore a discourse on memory and its representation in the built environment It argues that the reconstruction of New York must be considered in relation to larger issues of urban development ongoing global conflicts the rise of digital media and the culture philosophy and aesthetics of memory It shows how understanding architecture in New York post 9 11 requires bringing memory into contact with a complex array of political economic and social forces Demonstrating an ability to explain complex philosophical ideas in language that will be accessible to students and researchers alike in architecture urban studies cultural studies and memory studies this book serves as a thought provoking account of the intertwining of contemporary architecture media and memory

Art Book News Annual, volume 4: 2008, **Design & Applied Arts Index**, 2001 **New Books on Women, Gender and Feminism**, 2008 *The Devil, the Lovers, & Me* Kimberlee Auerbach, 2007 The author describes her survival of an abusive relationship her mother's mid life sexual proclivities and the interference of friends and her father during a promising new romance challenges that prompted her visit to an atypical tarot card reader *The Architectural Index*, 2000

Cyberspace, 2001 The term cyberspace was first penned in 1984 by William Gibson in his science fiction novel Neuromancer However the architectural possibilities of this area of design were being investigated well before the term was popularised and with good reason

Embracing the Song of Phrase: An Emotional Symphony within **At Index Winka Dubbeldam**

In a global taken by screens and the ceaseless chatter of quick conversation, the melodic splendor and mental symphony developed by the prepared term frequently disappear in to the background, eclipsed by the relentless sound and disturbances that permeate our lives. However, located within the pages of **At Index Winka Dubbeldam** a charming fictional value brimming with natural feelings, lies an immersive symphony waiting to be embraced. Constructed by an elegant composer of language, that charming masterpiece conducts viewers on a mental trip, skillfully unraveling the concealed tunes and profound influence resonating within each carefully constructed phrase. Within the depths with this moving evaluation, we shall examine the book is central harmonies, analyze their enthralling writing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
