At the Bench Kathy Barker, 1998. *At the Bench* is a unique handbook for living and working in the laboratory. Much more than a simple primer or lab manual, this book is an essential aid to understanding how research groups work at a human level and how to fit in, what equipment is essential and how to use it properly, how to get started and get organized, how to set up an experiment, how to handle and use data, and reference sources, how to present yourself and your results in print and in person. Wise, light-hearted but thoroughly practical, it offers advice, moral support, social etiquette, and professional reassurance along with step-by-step instructions for those basic but vital laboratory procedures that are seldom explained to novices. For graduate students, physicians with research intentions, or laboratory technicians, this book is indispensable. For managers or mentors of such people, a copy will save hours of advice and instruction.

Academic Scientists at Work Jeremy Boss, Susan Eckert, 2006-10-16. A guide for scientists on the journey from the end of a postdoctoral career to the point of promotion to Associate Professor, this 2nd edition focuses on three aspects of the academic setting: Scholarship, Teaching, and Service. Valuable advice is provided on such topics as choosing and landing an academic job, setting up and managing the lab, obtaining funds, organizing writing and publishing your work, teaching and mentoring, and the promotion and tenure process.

Career Opportunities in Clinical Drug Research Rebecca Jane Anderson, 2010. It is simply amazing to me that so many of my industry coworkers stumbled upon their careers in clinical research like I did, merely by chance. In most cases, once those opportunities were presented to us, we found fulfilling and successful careers. Undoubtedly, other eager job seekers would also find this career path attractive. If only someone would tell them about it.

Statistics at the Bench Martina Bremer, Rebecca W. Doerge, 2010. This handbook is a convenient bench companion for biologists, designed as a handy reference guide for elementary and intermediate statistical analyses. Statistical methods most frequently used in publications and reports, as well as guidelines for the interpretation of results, are explained using simple examples with complete instructions for Excel.

The Chicago Guide to Landing a Job in Academic Biology C. Ray Chandler, Lorne M. Wolfe, Daniel E. L. Promislow, 2008-09-15. *The Chicago Guide to Landing a Job in Academic Biology* is an indispensable guide for graduate students and postdocs as they enter that domain, red in tooth and claw, the job market. An academic career in the biological sciences typically demands well over a decade of technical training. So it's ironic that when a scholar reaches the most critical stage in that career, the search for a job following graduate work, he or she receives little or no formal preparation. Instead, students are thrown into the job market with only cursory guidance on how to search for and land a position. Now there's help. Carefully, clearly, and with a welcome sense of humor, *The Chicago Guide to Landing a Job in Academic Biology* leads graduate students and postdoctoral fellows through the perils and rewards of their first job search. The authors, who collectively have for decades mentored students and served on hiring committees, have honed their

advice in workshops at biology meetings across the country. The resulting guide covers everything from how to pack an overnight bag without wrinkling a suit to selecting the right job to apply for in the first place. The authors have taken care to make their advice useful to all areas of academic biology, from cell biology and molecular genetics to evolution and ecology, and they give tips on how applicants can tailor their approaches to different institutions, from major research universities to small private colleges. With jobs in the sciences ever more difficult to come by, *The Chicago Guide to Landing a Job in Academic Biology* is designed to help students and post docs navigate the tricky terrain of an academic job search, from the first year of a graduate program to the final negotiations of a job offer.
