illuminating and essential thought James L Heft S M is President and Founding Director of the Institute for Advanced Catholic Studies and University Professor of Faith and Culture and Chancellor University of Dayton He has edited *Beyond Violence Religious Sources for Social Transformation in Judaism Christianity and Islam* Fordham **The Slain God** Timothy Larsen,2014 This book is a history of the relationship between the discipline of anthropology and the Christian faith It explores how leading anthropologists have come to believe that ethnographic findings and evidence made Christianity no longer tenable *An Analysis of Mary Douglas's Purity and Danger* Pádraig Belton,2018-02-21 Mary Douglas is an outstanding example of an evaluative thinker at work In *Purity and Danger An Analysis of Concepts of Pollution and Taboo* she delves in great detail into existing arguments that portray traditional societies as evolving from savage beliefs in magic to religion to modern science then explains why she believes those arguments are wrong She also adeptly chaperones readers through a vast amount of data from firsthand research in the Congo to close readings of the Old Testament and analyzes it in depth to provide evidence that traditional and Western religions have more in common than the first comparative religion scholars and early anthropologists thought First evaluating her scholarly predecessors by marshalling their arguments Douglas identifies their main weakness that they dismiss traditional societies and their religions by identifying their practices as magic thereby creating a chasm between savages who believe in magic and sophisticates who practice religion **The Future of Catholic Higher Education** James Heft,2021 After many years of scholarship administrative experience and leadership in Catholic higher education James Heft has written a book that draws upon many academic disciplines to paint a picture of the past the current situation challenges strengths and weaknesses of Catholic universities and after identifying its foundational pillars points the way to a future that is open to modern culture without capitulating to it embraces Catholic intellectual traditions without fossilizing them and presents a vision of its relationship to the hierarchy that is respectful independent faithful and dynamic *Redeeming Anthropology* Khaled Furani,2019-09-12 Anthropologists have invariably engaged in their discipline as a form of redemption whether to escape from social restriction nourish their souls reform their home polities or vindicate the natives *Redeeming Anthropology* explores how in pursuit of a secular science sired by the Enlightenment adherents to a faith in mankind have vacillated between rejecting and embracing theology albeit in concealed and contradictory ways Mining the biographical registers of the American British and French anthropological traditions Khaled Furani argues that despite all efforts to the contrary theological sediments remain in this disciplining discipline Rather than continuing to forget deny and sequester it theology can serve as a mirror for introspection as a source of critique offering invaluable tools for revitalization for thinking anew not only anthropology s study of others cultures but also its very own reason **Passing on the Faith** James L. Heft,2009-08-25 From the beginning the Abrahamic faiths Judaism Christianity and Islam have stressed the importance of transmitting religious identity from one generation to the next Today that sustaining mission has never been more challenged Will young people have a faith to guide them How can faith

traditions anchor religious attachments in this secular skeptical culture The fruit of a historic gathering of scholars and religious leaders across three faiths and many disciplines this important book reports on the religious lives of young people in today s world It s also a unique inventory of creative and thoughtful responses from churches synagogues and mosques working to keep religion a significant force in those lives The essays are grouped thematically Opening the book Melchor Sanchez de Toca and Nancy Ammerman explore fundamental issues that have an impact on religion from the cultural effects of global consumerism and personal technology to pluralism and individualism In Part Two leading investigators present three leading studies of religiosity among young people and college students in the United States illuminating the gap between personal values and organized religion and the emergence of new different forms of spirituality and faith How religious institutions deal with these challenges forms the heart of the book in portraits of best practices developed to revitalize traditional institutions from a synagogue in New York City and a Muslim youth camp in California to the famed French Catholic community of the late Brother John of Taiz Finally Jack Miles and Diane Winston weave the findings into a broader perspective of the future of religious belief practice and feeling in a changing world Filled with real world wisdom Passing the Faith will be an essential resource for anyone seeking to understand what religions must and can do to inspire a vigorous faith in the next generation

The Survival of Dulles Michael M. Canaris,2021-08-17 This collection marking the centenary of Avery Dulles s birth makes an entirely distinctive contribution to contemporary theological discourse as we approach the second century of the cardinal s influence and the twenty first of Christian witness in the world Moving beyond a festschrift the volume offers both historical analyses of Dulles s contributions and applications of his insights and methodologies to current issues like immigration exclusion and digital culture It includes essays by Dulles s students colleagues and peers as well as by emerging scholars who have been and continue to be indebted to his theological vision and encyclopedic fluency in the ecclesiological developments of the post conciliar Church Though focused more on Catholic and ecumenical affairs than interreligious ones the volume is intentionally outward facing and strives to make clear the diverse and pluralistic contours of the cardinal s nearly unrivaled impact on the North American Church which truly crossed ideological denominational and generational boundaries While critically recognizing the limits and lacunae of his historical moment it serves as one among a multitude of testaments to the notion that the ripples of Avery Dulles s influence continue to widen toward intellectually distant shores

Officers and Accountability in Medieval England 1170--1300 John Sabapathy,2019-09-13 The later twelfth and thirteenth centuries were a pivotal period for the development of European government and governance A mentality emerged that trusted to procedures of accountability as a means of controlling officers conduct The mentality was not inherently new but it became qualitatively more complex and quantitatively more widespread in this period across European countries and across different sorts of officer The officers exposed to these methods were not just state ones but also seignorial ecclesiastical and university college officers as well as urban communal

ones This study surveys these officers and the practices used to regulate them in England It places them not only within a British context but also a wide European one and explores how administration law politics and norms tried to control the insolence of office The devices for institutionalising accountability analysed here reflected an extraordinarily creative response in England and beyond to the problem of complex government inquests audits accounts scrutiny panels syndication Many of them have shaped the way in which we think about accountability today Some remain with us So too do their practical problems How can one delegate control effectively How does accountability relate to responsibility What relationship does accountability have with justice This study offers answers for these questions in the Middle Ages and is the first of its kind dedicated to an examination of this important topic in this period *The Cambridge Handbook of Natural Law and Human Rights* Tom Angier,Iain T. Benson,Mark D. Retter,2022-11-17 This Handbook provides an intellectually rigorous and accessible overview of the relationship between natural law and human rights It fills a crucial gap in the literature with leading scholarship on the importance of natural law as a philosophical foundation for human rights and its significance for contemporary debates The themes covered include the role of natural law thought in the history of human rights human rights scepticism the different notions of subjective right the various foundations for human rights within natural law ethics the relationship between natural law and human rights in religious traditions the idea of human dignity the relation between human rights political community and law human rights interpretation and tensions between human rights law and natural law ethics This Handbook is an ideal introduction to natural law perspectives on human rights while also offering a concise summary of scholarly developments in the field
