And Building Fit Organization Principles Competitive:

Building the Fit Organization: Six Core Principles for Making Your Company Stronger, Faster, and More Competitive Daniel Markovitz, 2015-10-22 Winner of The Shingo Research and Professional Publication Award Everyone knows that in order to reach optimum levels of health you have to exercise and that you have to keep at it day after day after day No big secret here It's the same with process improvement and specifically lean processes Everything there is to know about Lean has been revealed Countless books articles and seminars provide business leaders all the information they need to understand how lean works and how effective it can be when fully implemented Again not a secret Why then do companies invariably fail in their pursuit of operational excellence The same reason people fail to trim fat through exercise They don't do it They try to squeeze it into their schedule they don't make it part of their schedule And inevitably it becomes less of a priority In the same vein too many business leaders see process improvement as a project something separate from the more pressing goals of profits and growth That's where they go wrong And that's where Building the Fit Organization comes in In this practical hands on guide Markovitz walks you step by step through the process of making lean as intrinsic to your company as the pursuit of profits You will learn how to make an unshakeable commitment to increasing the value provided by doing the right work in the right way with continuous monitoring of processes and structured coaching for everyone You don't need another book about lean What you need to learn is how to make process improvement your company's purpose Like a serious athlete you're warmed up You know what lean is and how it can help your organization Now it's time to perform Building the Fit Organization is the next step to creating a company that can compete on the toughest of playing fields

Lean Empowerment and Respect for People Trevor Gundlach, 2024-02-20 There are two pillars of a Lean Management System Continuous Improvement and Respect for People Most books about Lean Production have focused overwhelmingly on Continuous Improvement and fail to treat Respect for People as an equal pillar It is overlooked or understated resulting not in a Lean house but in a lean to structure It is our responsibility to level out the structure once again The study of people is messy and exciting It demands that we explore multiple interdisciplinary studies including psychology sociology philosophy and even theology This book runs a parallel course with Lean Production but has a different goal Instead of production efficiency and financial gains our goal is to understand the reasons why staff come to work in the morning We can only understand a system when we understand its people They own the culture Lean must therefore evolve from a Production System into an Empowerment System Lean Production will no longer serve the contemporary workforce knowledge workers if you are reading this you are likely a knowledge worker who deserves more than a repackaging of the same ideas You are not a line worker and your system should not treat you as such Therefore we need a new system One that prioritizes Respect for People over Continuous Improvement Leaders in this system must recognize belonging and psychological safety as preconditions to process innovation New definitions of value and waste the staples of Lean philosophy

must take on a more human face and propel the change of culture We must flip Lean on its head for the sake of our modern workforce
