Oliver,2019-07-16 Most people believe the Federal Bureau of Investigation began under J Edgar Hoover in the 1920s or 1930s Many also naturally assume it was developed for the express purpose of fighting crime However the reality is very different The reality is it began years earlier in 1908 under President Theodore Roosevelt In The Birth of the FBI Teddy Roosevelt the Secret Service and the Fight Over America's Premier Law Enforcement Agency Willard Oliver details the political fight that led to the birth of America's premier law enforcement agency Roosevelt was concerned about conservation and one issue he wanted enforced were the fraudulent land deals being perpetrated by many people including some members of Congress When he began using the Secret Service to investigate these crimes Congress blocked him from doing so The end result of this political spat was Roosevelt's creation of the FBI which heightened the political row between the two branches of government in the final year of Roosevelt's presidency The truth of the matter is the premier law enforcement agency in the United States was actually created because of a political fight between the executive and legislative branches of government The Birth of the FBI reveals the true story behind the birth of the FBI and provides some useful insight into an important part of our American history The United States Secret Service Walter S. Plants and the Plague: The Herbal Frontline Marcus Harrison, 2015 Plague has gone down in history as one of the terrors of humanity and if there was perhaps but one word that conjured fear in the minds of people centuries ago it would have been that of plague Without any understanding of germ theory physicians could only attempt to deal with the visible symptoms of a plague attack and not overcome the bacterium at its heart *Yersinia pestis* Plants and the Plague looks at around three dozen plant species used in the herbal medicine response to plague and pestilence in past centuries It also looks at the clinical background to the disease past medical thinking on the subject courses of treatment formerly used and numerous plague remedies that the selected plants found their way into It is a story of superstition tragedies of error and faith in misguided medical precepts but also one of incredible bravery on the part of those physicians and doctors who stayed behind to treat the afflicted and dying in the face of this killer disease

Open Secret Erin Arvedlund, 2014-09-25 Gaming the LIBOR that is fixing the price of money had become just that a game Playing it was the price of admission to a club of men who socialized together skied in Europe courtesy of brokers and expense accounts and reaped million dollar bonuses In the midst of the financial crisis of 2008 rumors swirled that a sinister scandal was brewing deep in the heart of London Some suspected that behind closed doors a group of chummy young bankers had been cheating the system through interest rate machinations But with most eyes focused on the crisis rippling through Wall Street and the rest of the world the story remained an open secret among competitors Soon enough the scandal became public and dozens of bankers and their bosses were caught red handed Several major banks and hedge funds were manipulating and misreporting their daily submission of the London Interbank Offered Rate better known as the LIBOR As the main interest rate that pulses through the banking community the LIBOR was supposed to represent the average rate banks charge each other for loans effectively setting short term interest rates around the world for trillions of dollars in financial contracts But the LIBOR wasn't an average it was a

combination of guesswork and outright lies told by scheming bankers who didn't want to signal to the rest of the market that they were in trouble. The manipulation of the world's most important number was even greater than many realized. The bankers kept things looking good for themselves and their pals while the financial crisis raged on. Now Erin Arvedlund, the bestselling author of *Too Good to Be True*, reveals how this global network created and perpetuated a multiyear scam against the financial system. She uncovers how the corrupt practice of altering the key interest rate occurred through an unregulated and informal honor system in which young masters of the universe played fast and loose while their more seasoned bosses looked the other way and would later escape much of the blame. It was a classic private understanding among a small group of competitors: you scratch my back today, I'll scratch yours tomorrow. Arvedlund takes us behind the scenes of elite firms like Barclays Capital, UBS, Rabobank, and Citigroup and shows how they hurt ordinary investors, from students taking out loans to homeowners paying mortgages to cities like Philadelphia and Oakland. The cost to the victims as much as 1 trillion. She also examines the laxity of prominent regulators and central bankers and exposes the role of key figures such as Tom Hayes, a senior trader for the Swiss financial giant UBS who worked with traders across eight other banks to influence the yen LIBOR; Bob Diamond, the shrewd multimillionaire American CEO of Barclays Capital, the British bank whose traders have been implicated in the manipulation of the LIBOR; Mervyn King, the governor of the Bank of England who ignored U.S. Treasury secretary Tim Geithner's repeated recommendations to establish stricter regulations over the interest rate. Arvedlund pulls back the curtain on one of the great financial scandals of our time, uncovering how millions of ordinary investors around the globe were swindled by the corruption and greed of a few men.
