Multilateral Asian Security Architecture See Seng Tan, 2015-07-16 This book provides a comparative assessment of the material and ideational contributions of five countries to the regional architecture of post Cold War Asia In

contrast to the usual emphasis placed on the role and centrality of the Association of Southeast Asian Nations ASEAN in Asia's multilateral architecture and its component institutions this book argues that the four non ASEAN countries of interest here 3 4 Australia Japan China and the United States 3 4 and Indonesia have played and continue to play an influential part in determining the shape and substance of Asian multilateralism from its pre inception to the present The work does not contend that existing scholarship overstates ASEAN's significance to the successes and failures of Asia's multilateral enterprise Rather it claims that the impact of non ASEAN stakeholders in innovating multilateral architecture in Asia has been understated Whether ASEAN has fared well or poorly as a custodian of Asia's regional architecture the fact remains that the countries considered here notwithstanding their present discontent over the state of that architecture are key to understanding the evolution of Asian multilateralism This book will be of much interest to students of Asian politics international organisations security studies and IR more generally

Reshaping the Asia Pacific Economic Order

Christopher Findlay, Hadi Soesastro, 2004-08-02 This discussion directs attention to the fact that economic cooperation and security are complementary Asia's Regional Architecture Andrew Yeo, 2019-04-02 During the Cold War the U S built a series of alliances with Asian nations to erect a bulwark against the spread of communism and provide security to the region Despite pressure to end bilateral alliances in the post Cold War world they persist to this day even as new multilateral institutions have sprung up around them The resulting architecture may aggravate rivalries as the U S China and others compete for influence However Andrew Yeo demonstrates how Asia's complex array of bilateral and multilateral agreements may ultimately bring greater stability and order to a region fraught with underlying tensions Asia's Regional Architecture transcends traditional international relations models It investigates change and continuity in Asia through the lens of historical institutionalism Refuting claims regarding the demise of the liberal international order Yeo reveals how overlapping institutions can promote regional governance and reduce uncertainty in a global context In addition to considering established institutions such as the Association of Southeast Asian Nations and the Asia Pacific Economic Cooperation he discusses newer regional arrangements including the East Asia Summit Trans Pacific Partnership and the Belt and Road Initiative This book has important implications for how policymakers think about institutional design and regionalism in Asia and beyond
