API Standard 620

Design and Construction of Large, Welded, Low-pressure Storage Tanks

First Edition (2000), October 2012 | 117 Pages | Size: 8 1/2" x 11" | Product No. 000019

The API Committee on Design has presented this standard to cover large, low-pressure storage tanks of the type described in 1.1 that contain petroleum hydrocarbons (gases or vapors and liquid products) as well as other liquid products commonly handled and stored by the service branches of the industry.

The Manufacturer of a low-pressure storage tank that will house this API 620 material shall ensure that the tank is constructed in accordance with the requirements of this standard.

Coverage

This standard covers the design and construction of large, welded, low-pressure carbon steel above ground storage tanks (including floating-roof tanks) that have a single vertical axis of rotation. This standard does not cover design procedures for tanks that have walls shaped in such a way that the walls cannot be generated in their entirety by the rotation of a suitable section around a single vertical axis of rotation.

The tanks covered in this standard are designed for rated temperatures not greater than 200 °F and are constructed to their gross liquid heights not more than 120 ft (36.6 m) gauge.

The tanks covered in this standard provide for installation in areas where the lowest recorded 2-day mean atmospheric temperature is -50 °F. Tanks designed otherwise must be designed for storage tanks in elevated temperatures, tanks in all grades, tanks that are low temperature tanks or tanks low-pressure storage tanks for refrigerated products at temperatures from -50 °F to -100 °F, tanks designed for low-pressure storage tanks for liquefied gases at temperatures not lower than -200 °F.

Api 620 12th Edition:

Design and Construction of LNG Storage Tanks Josef Rötzer, 2019-11-12 Worldwide the use of natural gas as a primary energy source will remain vital for decades to come This applies to industrialized emerging countries and developing countries Owing to the low level of impurities natural gas is considered to be a climate friendly fossil fuel because of the low CO₂ emissions but is at the same time an affordable source of energy In order to enable transport over long distances and oceans and hence create an economic and political alternative to pipelines the gas is liquefied which is accompanied by a considerable reduction in volume and then transported by ship Thus at international ports many LNG tanks are required for temporary storage and further use The trend towards smaller liquefaction and regasification plants with associated storage tanks for marine fuel applications has attracted new players in this market who often do not yet have the necessary experience and technical expertise It is not sufficient to refer to all existing technical standards when defining consistent state of the art specifications and requirements The switch to European standardisation has made it necessary to revise and adapt existing national codes to match European standards Technical committees at national and international level have begun their work of updating and completing the EN 14620 series In the USA too the corresponding regulations are also being updated The revision of American Concrete Institute standard ACI 376 Requirements for Design and Construction of Concrete Structures for the Containment of Refrigerated Liquefied Gases first published in 2011 will be completed in the spring of 2019 and the final version published in autumn 2019 This book provides an overview of the state of the art in the design and construction of liquefied natural gas LNG tanks Since the topic is very extensive and complex an introduction to all aspects is provided e g requirements and design for operating conditions thermal design hydrostatic and pneumatic tests soil surveys and permissible settlement modelling of and calculations for the concrete structure and the actions due to fire explosion and impact Dynamic analysis and the theory of sloshing liquid are also presented Storage Tanks Selection,
