Science Whispering Spirit Gary G. Preuss, PhD, 2015-10-08 Something extraordinary is going on Science is finding that much of the paranormal is really normal But even though research is uncovering the truth of psychic phenomena psychics rarely win lottery jackpots Why is that Evidence increasingly indicates that our consciousness survives physical death but few people converse with loved ones who have passed away Why is that The statistical probability that our universe exists at all is remote yet the scientific paradigm is reluctant to allow that it might be designed Why is that And repeatedly fewer people are involved in cataclysmic tragedies than the odds would expect for the time and location Yet most of us do not recognize intuitive hints to avoid serious misfortune Why is that For centuries science dismissed much paranormal weirdness as coincidence without seriously looking at it It is now discovering that we are experiencing more than coincidence But much remains hidden intuition is rarely obvious and psychic errors abound Why Why indeed Hop aboard to explore some answers
