Williams,2012-12-06 In this IAU Symposium on Wolf Rayet stars binary aspects received ample attention notably because of the recognition that many observations of spectral and photometric variability at all accessible wavelengths are related to colliding winds or other forms of wind interaction The basic structure of the conference and its proceedings is basic parameters and general properties of WR stars state of the art model atmospheres for WR stars anisotropic mass loss and disk formation of WR stars properties of WR binaries influence of stellar winds on mass transfer in hot massive binary evolution dust formation near WR stars and other circumstellar phenomena and hydrodynamics and high energy physics of colliding winds in WR O binaries and of WR winds interacting with compact objects Within this framework 20 invited reviews 38 invited oral contributions and 76 poster papers were presented at the Symposium entertaining 111 astronomers from 24 countries These proceedings provide up to date information on all aspects of Wolf Rayet atmospheres binaries and colliding winds

Revista Mexicana de Astronomía Y Astrofísica ,2002 **Civic Astronomy** George Wise,2012-11-07 The founding of the Dudley Observatory at Albany N Y in 1852 was a milestone in humanity s age old quest to understand the heavens As the best equipped astronomical observatory in the U S led by the first American to hold a Ph D in astronomy Benjamin Apthorp Gould Jr the observatory helped pioneer world class astronomy in America It also proclaimed Albany s status as a major national center of culture knowledge and affluence This book explores the story of the Dudley Observatory as a 150 year long episode in civic astronomy The story ranges from a bitter civic controversy to a venture into space from the banks of the Hudson River to the highlands of Argentina It is a unique glimpse at a path not taken a way of doing science

once promising now vanished As discoveries by the Dudley Observatory's astronomers especially its second director Lewis Boss made significant contributions to the modern vision of our Milky Way galaxy as a rotating spiral of more than a million stars the advance of astronomy left that little observatory behind *Astronomía X*, 1998

Solar and Space Weather Radiophysics D.E. Gary, C.U. Keller, 2006-01-20 This volume is the outgrowth of several international meetings to discuss a vision for the future of solar radio physics the development of a new radio instrument From these discussions the concept for the Frequency Agile Solar Radiotelescope FASR was born Most of the chapters of this book are based on invited talks at the FASR Science Workshop held in Greenbank, WA in May 2002 and a special session on Solar and Space Weather Radiophysics held at the 200th American Astronomical Society meeting held in Albuquerque, NM in June 2002 Although many of the chapters deal with topics of interest in planning for FASR other topics in Solar and Space Weather Radiophysics such as solar radar and interplanetary scintillation are covered to round out the discipline The authors have been asked to write with a tutorial approach to make the book useful to graduate students and scientists new to radio physics This book is more than a compilation of FASR science topics The FASR instrument concept is so revolutionary by extending capability by an order of magnitude in several dimensions at once frequency coverage spatial resolution dynamic range time resolution polarization precision that it challenges scientists to think in new ways The authors of the following chapters have been tasked not only with reviewing the current state of the field but also with looking to the future and imagining what is possible Radio emission is extremely complex because it is generated so readily and every imaginable plasma parameter affects it This is both its great strength and its weakness

Scientific Detectors for Astronomy P. Amico, James W. Beletic, 2006-04-18 Dear Friends It seems like it was only yesterday that we drove the last of you to the airport The memories and the spirit of the Scientific Detectors for Astronomy Workshop SDW2002 remain fresh and strong For us this was a very special event a great gathering of what may be one of the friendliest and most cooperative technical communities on our little planet We have tried to capture the spirit of the Workshop in these Proceedings and we hope you are able to relive your week in Hawaii For those readers who did not attend we invite you into this community As you probably noticed there is a new name on the cover Jenna Beletic was the ace up our sleeve for these Proceedings As a summer intern at Keck she took up the task of organizing proofreading editing and formatting the papers She also made the graphics her artistic talents shine on pages xxxiii and xxxv contacted authors and prepared the mountain of paperwork which goes with producing a book Jenna's enthusiasm at learning her passion for the job and creativity e.g. find 100 ways to get Paola and Jim to do their jobs have been a motivating addition to our team of old workshop folks and a source for a good deal of paternal pride We are honoured to have her as a fellow editor

Astronomy Communication Andre Heck, C. Madsen, 2013-03-14 Astronomy has always been one of the easiest of the sciences to convey to the public That is partly because it produces spectacular pictures that can be explained at least in part and admired partly because understanding of astronomy usually does not

depend upon a knowledge of a complex classification system or esoteric terminology and partly because its extremes in distances and times challenge our imagination and philosophies Most scientists enjoy sharing with others the discoveries made by themselves and their colleagues The primary purpose of scientific research is to discover to learn and to understand When we succeed we enjoy sharing that understanding Education is most pleasurable when our audience wishes to learn and we have something important to convey A field that does not communicate effectively with the public soon loses its interest and support Author Andre Heck explains the many different ways in which professional communication now occurs while Leslie Sage explains how such communication should be done Astronomy done with spacecraft and large equipment is very expensive and the funds for those ultimately come from the public The cost of astronomy prorated over the number of research astronomers is perhaps the highest in all the sciences If astronomers do not share their results with the public they will lose its support However for most astronomers the desire to share and educate dominates over the pragmatic need to win public support With the advent of new communication techniques television videos CDs DVDs animation simulations we have new methods to communicate in addition to the conventional ones of the printed and spoken word

The New Astronomy: Opening the Electromagnetic Window and Expanding our View of Planet Earth Wayne

Orchiston, 2006-01-17 This is an unusual book combining as it does papers on astrobiology history of astronomy and sundials but after all Woody Sullivan is an unusual man In late 2003 I spent two fruitful and enjoyable months in the Astronomy Department at the University of Washington UW working on archival material accumulated over the decades by Woody for a book we will co-author with Jessica Chapman on the early development of Australian astronomy The only serious intellectual distraction I faced during this period was planning for an IAU colloquium on transits of Venus scheduled for June 2004 in England where I was down to present the Cook paper I knew Woody was also interested in transits and indeed anything remotely connected with shadows see his paper on page 3 and in discussing the Preston meeting with him it transpired that his 60th birthday was timed to occur just one week later This was where the seed of Woodfest began to germinate Why not invite friends and colleagues to join Woody in Seattle and celebrate this proud event I put the idea to Woody and others at UW they liked it and Woodfest was born
