Begriff Natur Lehre Karl Marx:

The Formation of the Economic Thought of Karl Marx Ernest Mandel, 2016-09-06 A clear and compact guide to Marx's road to *Das Kapital* Ernest Mandel traces the development of Marx's economic ideas from the Economic and Philosophical Manuscripts to the completion of the *Grundrisse* In a series of crystalline chapters he provides an overview of subjects central to Marxist economic theory Mandel focuses on Marx's concept of alienation which gained much currency among Marxists in the twentieth century and traces the development of debates surrounding the labour theory of value and Marx's writings on communism and crisis These discussions remain pertinent today and these texts vital to all those who wish to interpret and to change the world [Karl Marx's Ecosocialism](#) Kohei Saito, 2017-10-24 Delving into Karl Marx's central works as well as his natural scientific notebooks published only recently and still being translated the author argues that Karl Marx actually saw the environment crisis embedded in capitalism The book shows us that Marx has given us more than we once thought that we can now come closer to finishing Marx's critique and to building a sustainable ecosocialist world Page 4 of cover **Marx's Theories Today**, 2023-07-24 *Karl Marx's Grundrisse* Marcello Musto, 2008-07-25 Written between 1857 and 1858 the *Grundrisse* is the first draft of Marx's critique of political economy and thus also the initial preparatory work on *Capital* Despite its editorial vicissitudes and late publication *Grundrisse* contains numerous reflections on matters that Marx did not develop elsewhere in his oeuvre and is therefore extremely important *Studies of the Paris Manuscripts* Lixin Han, 2020-02-22 This book is devoted to the studies of Karl Marx's Paris Manuscripts and presents a new interpretation of early Marx arguing that his transition to maturity can be found in these manuscripts and specifically in *Comments on James Mill* which was drafted between the First Manuscript and the Second Manuscript In *Comments on James Mill* Marx succeeds in transferring his theoretical framework from the isolated individual to the society and establishes his basic goal i.e. to explicate the nature of humans and society from the perspective of external economic relations marking the advent of historical materialism This study reopens the possibility of interpreting the Paris Manuscripts from the perspective of Hegel According to the author it was during the Paris Manuscripts period that Marx shifted his theoretical foundations from Feuerbach to Hegel On the basis of Hegel's alienation concept Marx constructs a new form of alienation theory with alienation of intercourse at its core The theoretical challenge tackled by this book is to restore the authority of alienation theory and strengthen the position of the Paris Manuscripts in the history of Marx thought so as to rearrange the traditional landscape of research on early Marx thought This interpretation proposed and published for the first time in the world could compete with the theses of Louis Althusser and Hiromatsu Wataru which consider *Die deutsche Ideologie* to be the turning point of Marx Further it represents a significant contribution by a Chinese scholar to the international research on Marx
