Strategies of Deconstruction Joseph Claude Evans, 1991 Strategies of Deconstruction was first published in 1991 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In the past two decades the movement of deconstruction has had tremendous impact on a number of academic disciplines in the United States However its force has been rather limited in the field of philosophy despite the fact that in Europe the practice of deconstruction emerged in the work of philosophers Although the reasons for this can be debated two of the more obvious explanations are the mainstream Anglo American philosophers rarely studied the German and French philosophical traditions in great detail and deconstruction s focus on discourse and interpretation has made it more attractive to the literary and humanistic disciplines With this context Strategies of Deconstruction focuses on the early work of Jacques Derrida the French philosopher who introduced deconstruction in Speech and Phenomena his study of Edmund Husserl and Of Grammatology and whose philosophical reputation stems in no small part from his work on Husserl In examining the philosophical import of Derrida s theories of reading text and language

specifically as they related to Speech and Phenomena J Claude Evans makes careful reference to Husserl's own texts His analysis indicates that there are many systematic irregularities in Derrida's study and that without those irregularities Derrida's conclusions cannot be substantiated

The Poetics of Philosophy [A Reading of Plato] David Ross, 2008-12-18 The Poetics of Philosophy is my attempt to hear what academic philosophy attempts to silence namely how reason resonates with madness It is thus a stinging of the great steed of academia in order to recover and re experience what otherwise would be repressed by the exigencies of bureaucratic commodity life in the late capitalist world An analysis of Plato's principal dialogues with a view towards developing the author's conception of thinking knowing and loving it incorporates the insights of Heidegger Nietzsche and Derrida Provoking the world mind to reflect upon its phenomenological possibility for Being dispersed within its daily routines or business the book argues for the metaphysicality of physical reality articulated through the narrative trope of fractal dialectical logic The present volume's more general implications extend the insights of the author's previous work in the area of social science I refer to the possibility for world communist revolution which is predicated on communism's thorough ridding itself of its naive materialist perspective the relics of a Newtonian Universe and its embracing of a fractal dialectical logic or similar that is better able to incorporate the yearning for immortality desire to experience beauty and the need to have a meaningful life that define human species life To articulate such a framework is the aim of my general research
