Beknopte Schooflora:

Beknopte zak- en schooflora Anthonie Cornelis Oudemans (Jzn),1898 **Geographical Guide to Floras of the World**
Sidney Fay Blake,Alice Cary Atwood,1942 Annotated selected list of floras and floristic works relating to vascular plants
including bibliographies and publications dealing with useful plants and vernacular names Guide to Standard Floras of
the World David G. Frodin,2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and
related works of inventory for vascular plants The second edition was completely updated and expanded to take into account
the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic
documentation The works covered are principally specialist publications such as floras checklists distribution atlases
systematic iconographies and enumerations or catalogues although a relatively few more popularly oriented books are also
included The Guide is organised in ten geographical divisions with these successively divided into regions and units each of
which is prefaced with a historical review of floristic studies In addition to the bibliography the book includes general
chapters on botanical bibliography the history of floras and general principles and current trends plus an appendix on
bibliographic searching a lexicon of serial abbreviations and author and geographical indexes *Atlas of the Netherlands
Flora* J. Mennema,A.J. Quene-Boterendbrood,C.L. Plate,2013-12-11 There is an element of fascination which many people feel
about geographical maps because these maps allow fantasies about strange landscapes other peoples travels even
adventures Distribution maps depicting the area which a plant or animal species occupies would appear to be less romantic
but they are equally able to exercise our imagination or rather to stimulate our scientific curiosity Some distribution patterns
are repeated time and time again although rarely fully identical and with their study comes the inescapable question what is
it that determines a plant s area of distribution Almost immediately we find ourselves in the area of ecology for it is the plant
s demands of its environment climate soil which determines where it will be able to grow and where not However that is not
all there is to it for species as well as landscapes have their history and one needs to be informed about the climate and about
the distribution of land and sea in the past for instance before one can understand present distributions This aspect of
change in space and time historical plant geography is possibly the most fascinating part of plant geography However this
atlas covering a minuscule part of the world is not meant to be primarily a book of historical plant geography It is true that a
dynamic aspect is very prominent but this is on the smaller time scale of man made changes which mostly led to
impoverishments **Morbidity and Mortality Weekly Report** ,1994 **Guide to the Prices of Antiquarian and
Secondhand Botanical Books (1979-1982)** Leo Vogelenzang,1983 **Miscellaneous Publication** ,1961 Beknopte
school- en excursieflora voor Nederland Hendrick Heukels,1963 **Geographical Guide to Floras of the World:
Western Europe, by S.F. Blake** Sidney Fay Blake,1961 *The Botanica* ,1975
