First Bite Bee Wilson, 2015-12-01 Food historian Bee Wilson delves deep into the latest research from food psychologists neuroscientists and nutritionists to reveal that our food habits are shaped by family and culture memory and gender hunger and love We do not come into the world with an innate sense of taste or nutrition as omnivores we have to learn how and what to eat how sweet is too sweet and what food will give us the most energy for the coming day Drawing on the psychology of eating she shows that it is possible despite our dysfunctional food industry and habits to feed ourselves better *First Bite* Bee Wilson, 2015-12-01 We are not born knowing what to eat as omnivores it is something we each have to figure out for ourselves From childhood onward we learn how big a portion is and how sweet is too sweet We learn to enjoy green vegetables or not But how does this education happen What are the origins of taste In *First Bite* award winning food writer Bee Wilson draws on the latest research from food psychologists neuroscientists and nutritionists to reveal that our food habits are shaped by a whole host of factors family and culture memory and gender hunger and love Taking the reader on a journey across the globe Wilson introduces us to people who can only eat foods of a certain color prisoners of war whose deepest yearning is for Mom's apple pie a nine year old anosmia sufferer who has no memory of the flavor of her mother's cooking toddlers who will eat nothing but hotdogs and grilled cheese sandwiches and researchers and doctors who have pioneered new and effective ways to persuade children to try new vegetables Wilson examines why the Japanese eat so healthily whereas the vast majority of teenage boys in Kuwait have a weight problem and what these facts can tell Americans about how to eat better The way we learn to eat holds the key to why food has gone so disastrously wrong for so many people But Wilson also shows that both adults and children have immense potential for learning new healthy eating habits An exploration of the extraordinary and surprising origins of our tastes and eating habits *First Bite* also shows us how we can change our palates to lead healthier happier lives *How We Eat with Our Eyes and Think with Our Stomach* Melanie Mühl, Diana von Kopp, 2017-11-01 Cut through the juice cleanses and paleo diets to bring back some common sense The New York Times Book Review Outsmart Your Impulses and Eat Better A Belgian chocolate cake topped with a velvety homemade mousse catches your eye on the menu The next thing you know you've ordered it despite the hefty price But do you know why Through over 40 compelling questions this book explores how our eating decisions tread the line between conscious and subconscious and enables us to be more intelligent about food With expert insights that draw from psychology neuroscience popular culture and more learn to see the innumerable influences behind your diet and cravings from the size and color of your plate to the placement of products in a supermarket to the order in which you sit when out with friends And the chocolate cake Would you believe research shows that regional descriptions Belgian and emotive sensory language homemade velvety subtly affect your appetite Know what and why you eat when and how you do before you next sit down to dine *Baby-led Feeding* Jenna Helwig, 2023-06-06 What if you could skip the tiny jars and pouches of bland baby food in
