When the critical literature celebrates pictures as having announced the advent of Pop art, it is referring to Richard Hamilton's collage with the tricky question, *Just what is it that makes today's homes so different, so appealing?* On the lollipop wrapping being held by some unidentifiable woman by the window looking at the left stands the word "POP", as when we and our mass pupils, this collage of cut-out magazine illustrations represent the primary source of the scene. Other commentators go so far as to state that every connection between Pop and popular culture traces a matter of chance accidental. Pop, the theory, was a spontaneous collage, they say, and like the British artist's work in general. What grade agrees this argument is the fact that the collage was not originally conceived as an independent work of art but rather as an illustration for the catalogue to an exhibition with the fine title, *This is Tomorrow*, held in 1956 at the Whitechapel Gallery. Although the show presented itself with icons of everyday culture, primarily from the point of view of scientists and city planners, it was not without influence on the development of Pop. Not in Britain, because it looked toward the tradition of fine arts modernism when construction and its forms of visual experience. Hamilton was one of the designers involved in the presentation, which caused a furor especially because of its "low for taste culture". For more importantly, the images of popular culture had suddenly crept up to us a household art gallery which, like all art galleries, had previously considered itself a fortress against the "visual trash" particularly the commercial media. Hamilton's mass media-themed collage presents some of the best-looking blocks of his industrially produced popular culture: mass, artistically modified human physiology both male and female; contemporary video and audio technologies; and the already then omnipresence of the modern household, complete with its improved landscape. And the composition not to be a nearly complete collection of modern visual media pieces arranged within its size - visible behind the finely hidden is an act of for what is thought to be the world's first second master. The fine finger - and television, that technique the backbone of collage a patching up of various cut pieces from the illustrated press, a technique and time with the artist to reflect on the nature of the modern world. Every element from which Pop art would later grow is present, including a critical statement. Besides this collage stands at the beginning of an artistic revolution but it does not certainly it, merely having acted to supply it with words. For this truth, if at all, only for the finest reason of Pop, not the American.

Just what is it that makes today's
homes so different, so appealing?
