Introduction to Mobile Communications Tony Wakefield, Dave McNally, David Bowler, Alan Mayne, 2007-04-19 The traditionally separate Fixed Mobile and Internet sectors have been evolving recently toward a single sector offering numerous implications for those involved in technology and business. It is therefore essential for telecommunication professionals to get a keen grasp of where the industry is heading. Providing a solid foundation in the industry, *Introduction to Mobile Communications: Technology, Services, Markets* explores the core requirements of modern mobile telecommunications from markets to technology. It explains how wireless systems work, how mobility is supported, the underlying infrastructure, and what interactions are needed among the different functional components. The book also examines how mobile communications are evolving in order to meet the changing needs of users. The information provided in the book comes primarily from the four core modules of the Certificate in Mobile Communications Distance Learning program run by the Informa Telecoms Academy in London. Designed by a highly experienced training development team, the program examines the complex and fascinating world of mobile communications. Designed to give a broad picture of mobile communications, the book provides an excellent grounding for those involved in both business and engineering, leaving them much better equipped to fulfill roles within their current or prospective companies. [Understanding 5G Mobile Networks](#) Peter Curwen, Jason Whalley, 2021-03-08 *Understanding 5G Mobile Networks: A Multidisciplinary Primer* offers the first manageable overview of 5G for a non-technical audience and specifically a broad multidisciplinary survey of the spectrum and the licensing and launch of 5G networks throughout the world, distinguishing standalone 5G from non-standalone 5G. **FCC Record** United States. Federal Communications Commission, 2016 [Spectrum Sharing](#) Constantin B. Papadias, Tharmalingam Ratnarajah, Dirk T. M. Slock, 2020-03-13 Combines the latest trends in spectrum sharing both from a research and a standards regulation/experimental standpoint. Written by noted professionals from academia, industry, and research labs, this unique book provides a comprehensive treatment of the principles and architectures for spectrum sharing in order to help with the existing and future spectrum crunch issues. It presents readers with the most current standardization trends, including CEPT, CEE, eLSA, CBRS, MulteFire, LTE Unlicensed, LTE-U, LTE-WLAN integration with Internet Protocol security tunnel, LWIP, and LTE Wi-Fi aggregation, LWA, and offers substantial trials and experimental results as well as system-level performance evaluation results. The book also includes a chapter focusing on spectrum policy reinforcement and another on the economics of spectrum sharing. Beginning with the historic form of cognitive radio, *Spectrum Sharing: The Next Frontier in Wireless Networks* continues with current standardized forms of spectrum sharing and reviews all of the technical ingredients that may arise in spectrum sharing approaches. It also looks at policy and implementation aspects and ponders the future of the field. White spaces and database-assisted spectrum sharing are discussed as well as the licensed shared access approach and cooperative communication techniques. The book also covers

reciprocity based beam forming techniques for spectrum sharing in MIMO networks resource allocation for shared spectrum networks large scale wireless spectrum monitoring and much more Contains all the latest standardization trends such as CEPT ECC eLSA CBRs MulteFire LTE Unlicensed LTE U LTE WLAN integration with Internet Protocol security tunnel LWIP and LTE Wi Fi aggregation LWA Presents a number of emerging technologies for future spectrum sharing collaborative sensing cooperative communication reciprocity based beamforming etc as well as novel spectrum sharing paradigms e g in full duplex and radar systems Includes substantial trials and experimental results as well as system level performance evaluation results Contains a dedicated chapter on spectrum policy reinforcement and one on the economics of spectrum sharing Edited by experts in the field and featuring contributions by respected professionals in the field world wide Spectrum Sharing The Next Frontier in Wireless Networks is highly recommended for graduate students and researchers working in the areas of wireless communications and signal processing engineering It would also benefit radio communications engineers and practitioners

Technologies for Conflict Management Marta Poblet, 2011-06-22 Mobile phones are the most ubiquitous communications technology in the world. Besides transforming the way in which we communicate, they can also be used as a powerful tool for conflict prevention and management. This book presents innovative uses of mobile technologies in the areas of early warning, disaster and humanitarian relief, governance, citizens' participation, etc., and cuts across different regions. The book brings together experts and practitioners from different fields: mobile technologies, information systems, computer sciences, online dispute resolution, law, etc., to reflect on present experiences and to explore new areas for research on conflict management and online dispute resolution (ODR). It also reflects on the transition from present ODR to future mobile Dispute Resolution and discusses key privacy issues. The book is addressed to anyone involved in conflict prevention and dispute management, aiming to learn how mobile technologies can play a disruptive role in the way we deal with conflict. Law and Regulation of Mobile Payment Systems

Joy Malala, 2017-11-28 Over the last ten years, mobile payment systems have revolutionised banking in some countries in Africa. In Kenya, the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market, it has attracted over 18 million subscribers, which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination, as a whole, of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya. Broadcasting & Cable, 2009-07 ,
