A New Cancer Killer Method Cancer Prevention Cancer Nutrition:

The Cancer Prevention Diet, Revised and Updated Edition Michio Kushi, Alex Jack, 2009-08-18 Since its original publication a quarter century ago The Cancer Prevention Diet has been one of the most popular guides to the prevention and relief of society's most feared disease Drawing on the most up to date cancer research Michio Kushi and Alex Jack present a dietary program that can be implemented safely and simply at home at a fraction of the cost of usual meals and medical care This completely revised and updated twentyfifth anniversary edition includes Broader dietary guidelines and new recipes New research on the twenty most frequent types of cancer New ways to combine macrobiotics with chemotherapy radiation and more The latest statistics studies and treatments The role of positive emotions in the healing process *The Cancer Prevention Diet* Michio Kushi, Alex Jack, 1994-12-15 Michio Kushi's macrobiotic blueprint for the prevention and relief of disease Revised and updated with the latest research new recipes and practical suggestions for relieving 25 types of cancer Drawing on the most up to date cancer and heart research Michio Kushi presents a ground breaking dietary program that can be implemented safely and simply in the home at a fraction of the cost of usual meals and medical care As the risk and incidence of cancer increases The Cancer Prevention Diet continues to be essential reading for anyone seeking to maintain or regain optimum health through natural means Novel Approach to Curing Cancer Jianqing Wu, Ping Zha, 2019-08-11 In this book the authors make extensive comparison between medical treatments and health optimization methods an improved mind body model in order to determine their relative and TRUE benefits for cancer patients For the health optimization method they examine its use history acceptance and performance throughout its history and for medicine they examine medical treatment history leading cancer theories standard of care formation formation of legal frameworks and overwhelming performance data we could find from the massive medical literature We can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing The book 1 discloses a systematic methodology for curing cancer in confidence 2 extensively discusses how to do right things to win a speed contest in fighting cancer 3 extensively discusses how to do right things to control cancer cell population a critical strategy for survival 4 provides detailed analysis of fatal common mistakes that have taken nine of ten cancer patient lives 5 exposes flaws in the cancer treatment models medical research model the foundation of medicine and 6 conduct a detailed analysis of four killer factors which are routinely found in nearly all cancer care The approach used is similar to one used in Health Optimization Engineering a new branch of health art The book teaches the decisive roles of SPEED NUMBER and MULTIPLE FACTORS and how to fight cancer by using a two way optimization methodology Those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals Our simulation and our kinetic studies show that both cancer development and reversal processes would take many years The rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate This is why medicine cannot

recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish The approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach Moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method Based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases We try to analyze every issue in the most comprehensive way Our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data The most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews We try to built a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model The Metabolic Approach to Cancer Nasha Winters, Jess Higgins Kelley, 2017 The Optimal Terrain Ten Protocol to Reboot Cellular Health Since the beginning of the twentieth century cancer rates have increased exponentially now affecting almost 50 percent of the American population Conventional treatment continues to rely on chemotherapy surgery and radiation to attack cancer cells Yet research has repeatedly shown that 95 percent of cancer cases are directly linked to diet and lifestyle The Metabolic Approach to Cancer is the book we have been waiting for it offers an innovative metabolic focused nutrition protocol that actually works Naturopathic integrative oncologist and cancer survivor Dr Nasha Winters and nutrition therapist Jess Higgins Kelley have identified the ten key elements of a person s terrain think of it as a topographical map of our body that are crucial to preventing and managing cancer Each of the terrain ten elements including epigenetics the microbiome the immune system toxin exposures and blood sugar balance is illuminated as it relates to the cancer process then given a heavily researched and tested non toxic and metabolic focused nutrition prescription The metabolic theory of cancer that cancer is fueled by high carbohydrate diets not bad genetics was introduced by Nobel Prize laureate and scientist Otto Warburg in 1931 It has been largely disregarded by conventional oncology ever since But this theory is resurging as a result of research showing incredible clinical outcomes when cancer cells are deprived of their primary fuel source glucose The ketogenic diet which relies on the body s production of ketones as fuel is the centerpiece of The Metabolic Approach to Cancer Further Winters and Kelley explain how to harness the anticancer potential of phytonutrients abundant in low glycemic plant and animal foods to address the 10 hallmarks of cancer an approach Western medicine does with drug based therapies Their optimized genetically tuned diet shuns grains legumes sugar genetically modified foods pesticides and synthetic ingredients while emphasizing whole wild local organic fermented heirloom and low glycemic foods and herbs Other components of their approach include harm reductive herbal therapies like mistletoe considered the original immunotherapy and common in European cancer care centers and cannabinoids which shrink tumors and increase quality of
