Autocad Mep 2013 Users Guide:

The Aubin Academy Master Series: AutoCAD MEP, 2012, 2013 and beyond Paul F. Aubin, Darryl McClelland, Martin Schmid, Gregg Stanley, 2012-09-25 The Aubin Academy Master Series AutoCAD MEP is a concise manual focused squarely on the rationale and practicality of the AutoCAD MEP process. The book emphasizes the process of creating projects in MEP rather than a series of independent commands and tools. The goal of each lesson is to help the reader complete their projects successfully. Tools are introduced together in a focused process with a strong emphasis on why as well as how. The text and exercises seek to give the reader a clear sense of the value of the tools and a clear indication of each tool's potential. The Aubin Academy Master Series AutoCAD MEP is a resource designed to shorten your learning curve, raise your comfort level, and most importantly, give you real life tested practical advice on the usage of the software to create mechanical, electrical, and plumbing designs and calculations. Empowered with the information within this book, the reader will have insight into how to use AutoCAD MEP to create construction documents that are reflective of their standards and expectations. This edition is designed to take the core version 2012 text and make it compatible with version 2013 by providing a 2013 format dataset download and noting differences where they occur. This book is fully compatible with version 2012, 2013, and beyond. Visit paulaubin.com for free downloads and PDF chapters.

Revit MEP Step by Step 2020 Metric Edition Lu-Yen Chang, What's New In 2020 version: author adds a Tag Circuits unit to demonstrate how to use combined annotation tags with panel name and circuit number to tag electrical circuits. The purpose of this book is to provide efficient materials for those who want to learn the software of Autodesk Revit, especially for those who are interested in building MEP systems. This book is ideal for school students and instructors. It also helps MEP professionals who want to add this software tool to enhance their works. As the title Step by Step of this book implies, readers will exercise the software from the beginning to the end of the modeling. That's how you get the whole picture of the entire story and learn the software. This book covers five major disciplines of MEP systems: Mechanical, Hydronic, Piping, Electrical, Plumbing, Fire Protection. Besides the modeling of 3D Duct, Works, Conduits, and Piping, it also covers Energy Analysis, Lighting Calculation, Schedule Creations, and many MEP-related Properties. The last two are really the heart of Building Information. Author also included a bonus chapter of Architectural Modeling that will give the reader extra background and experience of the software. I wrote this book in two versions: Imperial and Metric. Readers can choose the one to suit their need. With 1000 steps, 1000 figures, 60 exercise files, download from author's Google Drive to guide you to complete the entire modeling of a building; there is no reason you cannot succeed.
