Clever Keto Dieting Lifestyle There was a time when everyone thought that fats were the enemy Back then we all focussed on the simple fact that fats contained more calories as well as some evidence suggesting that they might be linked to heart disease and other problems Indeed this is the premise that diet plans like Weight Watchers were founded on But over time fat has had an image change For starters it turned out that those studies linking fat with heart disease were unfounded What was more though it was also found that fat was better for keeping us feeling fuller for longer at least partly because it takes longer to be absorbed Suddenly everyone was raving about fat and it was carbs that had the bad reputation Carbs spike the blood with sugar resulting in an insulin response Sugar causes inflammation Simple carbs tend to be low in nutrients and make you hungry The list goes on So are carbs really the enemy Try the *Clever Keto Dieting Lifestyle* The Problem With Going No Carb The answer to that question is well and truly no While it s true that we get a lot of glucose from carbs what s also true is that this is actually necessary If you live only on fats for fuel then you ll be on what s known as a ketogenic diet and this can leave you low on energy over time Likewise completely avoiding all fruits and vegetables most of these are carbs will almost certainly lead to nutrient deficiencies as well as a very low fiber intake Low Carb Not No Carb Not only is avoiding carbs a little soul crushing and somewhat difficult it s also still a surefire way to end up low on energy If
