A Primer in Theory Construction, *Foundations of Theory Construction in The Social Sciences* Dejo A. Abdulrahman, 2025-09-24 The book opens with a discussion of the philosophical foundations of theorising in the social sciences goes on to describe the components of theory and then compares deduction and induction as tools of research and theory construction with particular emphasis on conceptualisation the identification of properties and dimensions constructing theoretical statements linking properties and dimensions as well as developing and integrating categories in deduction and induction respectively The writer of the book has made a bold attempt to produce an overview of the needful for the production of quality academic research reports beginning with a discussion on theories and theory building methodology and data analysis Attempts are also made to demonstrate the link between theory theorising on one hand and on the other methodology analysis of data and production of quality research reports The book undeniably fills the gap needed at this point helping teachers students of sociology and other social science disciplines in higher institutions of learning to gain mastery of the production of profound social scientific works I heartily commend the book to readers across sub Sahara Africa and beyond Professor Olayiwola Erinoshio PhD Toronto FNASA FSSAN **Theoretical Nursing** Afaf Ibrahim Meleis, 2007 This text guides you through the evolution of nursing s theoretical foundations and examines the ways in which these principles influence the practice of the discipline Jacket **Handbook of Sociological Theory** Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these these theories are diverse and represent the prominent theoretical discussions in sociology today Some

areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory
