

# EMILIO SEGRÈ

A black and white portrait of Emilio Segrè, an elderly man with short, light-colored hair, wearing a dark suit jacket, white shirt, and dark tie. He is looking slightly to the right of the camera with a serious expression. The background is dark and textured.

## A MIND ALWAYS IN MOTION

*THE AUTOBIOGRAPHY OF EMILIO SEGRÈ*

Three pencils are positioned vertically in the bottom right corner of the cover, pointing upwards. They are dark in color with light-colored erasers.

# A Mind Always In Motion The Autobiography Of Emilio Segre

## **A Mind Always In Motion The Autobiography Of Emilio Segrè:**

A Mind Always in Motion Emilio Segrè, 1993-01-01 The renowned physicist Emilio Segrè 1905-1989 left his memoirs to be published posthumously because he said I tell the truth the way it was and not the way many of my colleagues wish it had been This compelling autobiography offers a personal account of his fascinating life as well as candid portraits of some of this century's most important scientists such as Enrico Fermi E O Lawrence and Robert Oppenheimer Born in Italy to a well-to-do Jewish family Segrè showed early signs of scientific genius at age seven he began a notebook of physics experiments He became Fermi's first graduate student in 1928 and contributed to the discovery of slow neutrons and later was appointed director of the physics laboratory at the University of Palermo While visiting the Radiation Laboratory at Berkeley in 1938 he learned that he had been dismissed from his Palermo post by Mussolini's Fascist regime Lawrence then hired him to work on the cyclotron at Berkeley with Luis Alvarez Edwin McMillan and Glenn Seaborg Segrè was one of the first to join Oppenheimer at Los Alamos where he became a group leader on the Manhattan Project His account of that mysterious enclave of scientists all working feverishly to develop the atomic bomb before the Nazis did includes his description of the first explosion at Alamogordo Segrè writes movingly of the personal devastation wrought by the Nazis his struggles with fellow scientists and his love of nature His book offers an intimate glimpse into a bygone era as well as a unique perspective on some of the most important scientific developments of this century

*A Mind Always in Motion: The Autobiography of Emilio Segrè* Emilio Segrè, 2019-08-17 Born in Italy to a well-to-do Jewish family Emilio Segrè 1905-1989 became Enrico Fermi's first graduate student in 1928 contributed to the discovery of slow neutrons and was appointed director of the University of Palermo's physics laboratory in 1936 While visiting the Radiation Laboratory in Berkeley California in 1938 he learned that he had been dismissed from his Palermo post by Mussolini's Fascist regime Ernest O Lawrence hired him to work on the cyclotron at Berkeley with Luis Alvarez Edwin McMillan and Glenn Seaborg Segrè was one of the first to join Oppenheimer at Los Alamos where he became a group leader on the Manhattan Project In 1959 he won the Nobel Prize in physics for the discovery of the antiproton He was a professor of physics at UC Berkeley from 1946 until 1972 A readable absorbing interesting autobiography A valuable contribution by a person who witnessed the development of much of modern nuclear physics Segrè's description of the historic neutron experiments performed in Rome during the mid 1930s by Enrico Fermi's group of which Segrè was a member is of inestimable worth Glenn T Seaborg Physics Today A Mind Always in Motion is Emilio Segrè's account published four years after his death in 1989 of his personal life and his life in physics It is absorbing moving in places and frequently revealing Segrè noted in his preface I have not sought to display manners and tact I never had and I have tried to treat myself no better than any one else He ably succeeded in these purposes Daniel J Kevles Nature For general readers with an interest in the history of nuclear physics Segrè is among the most personable witnesses Publishers Weekly

**The Nuclear Muse** John Canaday, 2000 Canaday a poet and playwright who has been a Watson Fellow and a Starbuck Fellow in

Poetry at Boston University analyzes a variety of texts produced by physicists before during and after WWII including Niels Bohr's The Quantum Postulate the technical lectures used for training at Los Alamos scientist's descriptions of their work and of the Trinity test and Leo Szilard's postwar novella The Voice of the Dolphins He looks at physicists use of figurative language in the development of quantum theory and examines the role played by the rhetorics of exploration and religion in the construction of the Los Alamos community Includes bandw historical photos Annotation copyrighted by Book News Inc Portland OR

**Sakharov: A Biography** Richard Lourie, 2019-08-09 Seemingly shy Andrei Sakharov was in fact a man of three great passions His passion for physics ultimately lead him to create the Soviet H Bomb making the USSR a super power But he rejected all the position and prestige his inventions had brought him in the name of a greater passion for justice And yielding nothing to these two passions was his passion for human rights activist Elena Bonner their love story one of the great romances of our time This book tells the story of the man his passions and the time and place where they all played out As Richard Lourie's new subtle and revealing biography of Sakharov demonstrates Sakharov ranks with Nelson Mandela as a person who helped guide his country to democracy changing himself in the process One of the strengths of Lourie's biography is his description and analysis of how this transition occurred a fascinating account of Sakharov Lourie's analysis of Sakharov's complicated political journey seems authentic and immensely revealing Loren Graham The New York Times A vivid portrait of Sakharov this moral and intellectual giant Lourie has written a highly intelligent and exceptionally readable book He not only captures his protagonist admirably but exhibits a fine feel for the social and political backdrop as well as for the peculiar mixture of fearful servility and courageous generosity of the Russian people Among other things he vividly brings to life how the Communist regime constrained scientists sometimes even arresting and murdering them while those who survived persevered in their work to achieve remarkable results Aleksa Djilas Commentary Magazine Lourie does full justice to a life that could not be more engrossing The socially introverted son of Moscow intelligentsia Andrei Sakharov became a star physics pupil then chief architect of the Soviet Union's first thermonuclear device and later on a dissident and target of KGB ire and finally the moral conscience of a democratically awakening Russia The evolution from a politically passive scientist to a lonely figure holding sidewalk vigils outside kangaroo courtrooms is almost unfathomable for a non Russian Lourie however makes it comprehensible not least by painting with an artist's spare deft strokes this transcendent figure into the history of his day Robert Legvold Foreign Affairs Richard Lourie is ideally placed to write the first full biography of this remarkable man He was able to interview Sakharov and many of his colleagues He has translated Sakharov's memoirs and often uses direct speech drawn from them to take us behind the scenes without giving rise to the usual suspicion of novelistic invention This makes for an engagingly readable book Lourie's appraisal of Sakharov as a man is scrupulously balanced with as much emphasis on his obstinacy as on his compassion The book conveys both the elation of scientific work the intense love between Sakharov and his second wife and the bewildering nature of human courage Elaine Feinstein The Telegraph The

inventor of the Soviet H bomb Sakharov was in the forefront of the post war breakthrough in thermonuclear physics that led to the creation of atomic energy Yet he also stood heroically at times in the vanguard of the movement for human rights in the Soviet Union Richard Lourie tells both these stories in this first full length biography of the physicist and dissident Lourie has benefited from the recent publication of the KGB files on Sakharov He also knew the man himself whose Memoirs he helped to smuggle out of Russia to the West where they were published in Lourie s translation a year after Sakharov s death in 1989 Sakharov s widow Elena Bonner has helped Lourie s research which adds a welcome new perspective on the last 20 years of his eventful life when husband and wife were subjected to a bullying campaign of threats and slander by the KGB in a vain attempt to silence them Orlando Figes The Telegraph A solid factual and interpretive study Sakharov is an important account of one scientist s courage and his quest for a humane world at peace Herbert Mitgang Chicago Tribune This first biography of the renowned physicist Soviet dissident and Nobel Peace Prize winner weaves the details of Sakharov s life together with the history of the Soviet Union which barely outlasted him Lourie describes Sakharov s upbringing in a liberal family and his rise through the Soviet science program during the 1930s and 40s Lourie s vivid accounts of Sakharov s meetings with Stalin and KGB chief Beria his role in the intelligentsia his marriages and his cramped apartments offer a textured picture of Soviet life during the Cold War Lourie s intelligent engaging biography will be appreciated by those interested in Russian and Cold War history Publishers Weekly

**Swope of G.E.: The Story of Gerard Swope and General Electric in American Business** David Loth,2023-04-19 A sympathetic but objective biography Swope the man was quite typical of the executives who managed great American business enterprises a generation or so after their establishment He had the necessary talents the total commitment to the job and company the forceful drive the passion for reliable data the fondness for figures and the precise and analytical way of thought He differed in that he was more aware of the needs of his employees and the role his enterprise played in the larger society More like the present generation in this respect he was still not an organization man At G E no team fashioned policy Swope alone made the decisions Alfred Chandler The Economic History Review A decidedly valuable and creditable book the author very skillfully unfolds the basic facts of Swope s career he adroitly and succinctly unfolds Swope s career against the background of the times It is a tribute to Loth s ability and courage that he has succeeded in conveying so much information in so short a study one of the best businessman biographies of the past decade George S Gibb The Business History Review

**45 Years with Philips: An Industrialist's Life** Frederik Philips,2020-12-22 Frederik Philips is the son and nephew of the two brothers who in 1912 turned a family firm founded in 1891 into Philips NV which then grew in two generations from a small light bulb manufacturer to a worldwide company employing 380 000 people in 70 countries In this first person account Frederik Philips tells the story of his growing responsibilities in the company from a first job as a plant engineer to his difficult years during World War II when as one of four Board members of the company he dealt with German Nazi appointed administrators before having to go into hiding and

until the years 1961-1971 when he rose to the helm of the whole company. It is to be hoped that industry itself will learn something from his views on its powers and more particularly its responsibilities. The Times London Philips believes that the success of a company depends not on structure or organisation but on the attitudes of the people who work in it. As for the future Philips is optimistic about the ability of his company to continue to play its part in bringing prosperity to the world; the primary objective remains the same that Philips must be part of the cure, not of the disease, in the world. Financial Times London. Clearly this book is as much a corporate history as it is the story of one man's life; it is readable, often insightful and sometimes exciting as we came to grasp the impact of one man's leadership on a major industrial corporation's struggle to survive a horrible war and its spectacular growth in peacetime. Stephen D. Bodayla, The Business History Review.

**Madame Wu Chien-shiung: The First Lady Of Physics Research** Tsai-chien Chiang, 2013-09-04. Narrating the well-lived life of the Chinese Madame Curie, a recipient of the first Wolf Prize in Physics, 1978, the first woman to receive an honorary doctorate from Princeton University as well as the first female president of the American Physical Society, this book provides a comprehensive and honest account of the life of Dr. Wu Chien Shiung, an outstanding and leading experimental physicist of the 20th century.

**The Lost Elements** Marco Fontani, Mariagrazia Costa, Mary Virginia Orna, 2015. The story of the false entries, good faith errors, retractions and mistakes that occurred during the formation of the Periodic Table of Elements as we know it.

**Nuclear Dawn** James P. Delgado, 2011-12-20. At once fascinating and horrific, this book details the conception, development and impact of the atomic bombs infamously dropped over Hiroshima and Nagasaki in August 1945. The obliteration of Hiroshima and Nagasaki in August 1945 brought the world to a standstill. This unimaginable shock confirmed to the world that the race to develop a working atomic weapon during World War II had been won by the American-led international effort. Horrific and controversial even today, these first uses of the atomic bomb had intense ramifications not only on the continued development of the bomb but also on politics and popular culture. As well as the technological development, historian James Delgado also examines how the US Army Air Force had to develop the capacity to deliver the weapons and examines the sites where development and testing took place in order to give a comprehensive history of the dawning of the nuclear age.

**109 East Palace** Jennet Conant, 2007-11-01. From the bestselling author of Tuxedo Park, the extraordinary story of the thousands of people who were sequestered in a military facility in the desert for twenty-seven intense months under J. Robert Oppenheimer, where the world's best scientists raced to invent the atomic bomb and win World War II. In 1943, J. Robert Oppenheimer, the brilliant charismatic head of the Manhattan Project, recruited scientists to live as virtual prisoners of the U.S. government at Los Alamos, a barren mesa thirty-five miles outside Santa Fe, New Mexico. Thousands of men, women and children spent the war years sequestered in this top-secret military facility. They lied to friends and family about where they were going and what they were doing and then disappeared into the desert. Through the eyes of a young Santa Fe widow who was one of Oppenheimer's first recruits, we see how, for all his flaws, he developed into an

inspiring leader and motivated all those involved in the Los Alamos project to make a supreme effort and achieve the unthinkable
