In the middle ground, a large barge or platform is positioned in the river, with several people standing on it. The background shows a hilly landscape under a clear blue sky.

against his own heritage but he has done the conscience of his homeland a great service      *Recovering a Lost River* Steven Hawley, 2012-03-06 In the Pacific Northwest the Snake River and its wilderness tributaries were as recently as a half century ago some of the world's greatest salmon rivers. Now due to four federal dams the salmon population has dropped close to extinction. Steven Hawley, journalist and self-proclaimed river rat, argues that the best hope for the Snake River lies in dam removal, a solution that pits the power companies and federal authorities against a collection of Indian tribes, farmers, fishermen, and river recreationists. The river's health, as he demonstrates, is closely connected to local economies, freshwater rights, and energy independence. Challenging the notion of hydropower as a cheap green source of energy, Hawley depicts the efforts being made on behalf of salmon by a growing army of river warriors. Their message is persistent but disarmingly simple: is that all salmon need is water in their rivers and a clear way home.

*The River Returns* Christopher Armstrong, Matthew Evenden, H.V. Nelles, 2009-10-14 Alberta's iconic river has been dammed and plumbed, made to spin hydroelectric turbines and used to cleanse Calgary. Artificial lakes in the mountains rearrange its flow; downstream weirs and ditches divert it to irrigate the parched prairie. Far from being wild, the Bow is now very much a human product; its fish are as manufactured as its altered flow, changed water quality, and newly stabilized and forested banks. *The River Returns* brings the story of the Bow River's transformation full circle through an exploration of the recent revolution in environmental thinking and regulation that has led to new limits on what might be done with and to the river. Rivers have been studied from many perspectives, but too often the relationship between nature and people, between rivers and the cultures that have grown up beside them, have been separated. *The River Returns* illuminates the ways in which humans both inadvertently and consciously have interacted with nature to make the Bow.

*Undammed* Tara Lohan, 2025-10-14 Free-flowing rivers in the United States are an endangered species. With more than 500,000 dams in place, we've dammed and diverted almost every major river, straightening curves and blocking passage for fish and other aquatic animals, pushing many to the brink. Now a heartening new movement is helping to demolish harmful or obsolete structures and restore new life to rivers and the communities that depend on them. In doing so, it offers a pathway to undoing environmental harm to nature and to ourselves. In *Undammed*, environmental journalist Tara Lohan takes a clear-eyed look at the unexpected benefits of dam removal after centuries of dam building. In helping to restore rivers, she argues, we're protecting our own communities by improving water quality, enhancing public safety, and boosting fish populations that feed people, and restore rights for Native American Tribes. Lohan chronicles the removal effort of four dams on the Klamath River in northern California and southern Oregon, the largest dam removal and river restoration project in the world. In the Northwest, she walks readers through the politically heated debate over potential removal of dams on the Lower Snake River in Washington to help restore salmon and orcas. And she visits the Kennebec and Penobscot rivers in Maine, where time is running out to save Atlantic salmon. In the Southwest, Lohan considers the need to rethink the concrete monoliths on its largest rivers in the face of longer droughts, higher temperatures, and

overallocated resources And in Ohio she highlights how removing unneeded dams is helping the once lifeless Cuyahoga River bounce back benefitting urban communities in innumerable tangible ways In other efforts across the country she shows why removing deadbeat and small dams can have big impacts and is helping drive action beyond our borders In Europe where river barriers occur almost every half mile the US movement is spurring a rival effort to restore natural flow to rivers degraded by obstructions Undammed is an inspirational look at our changing relationship with the natural world showing the cascade of benefits that come when we no longer turn our backs on rivers And in helping to restore rivers we re helping ourselves

*A Story of Six Rivers* Peter Coates,2013-06-01 Many of the world s major cities sprang up on the banks of rivers Used for water food irrigation transportation and power rivers sustain life and connect the world together but most of us think of them simply as waterways that must be crossed on the way to another place Using four European and two North American rivers as examples *A Story of Six Rivers* considers the place of rivers in our world and emphasizes the inextricable links between history culture and ecology Peter Coates explores six rivers chosen as examples of the types of rivers found on the planet the Danube the second longest river in Europe the Spree which flows through Berlin the Po which cuts eastward across northern Italy the Mersey in northwest England the Yukon which runs through Canada and Alaska and the Los Angeles in California Creating a series of river biographies Coates gives voice to each of these bodies of water exploring how rivers nurture us provide cultural and economic opportunities and pose threats to our everyday lives He challenges recent narratives that paint rivers as the victims of abuse pollution and damage at the hands of humans focusing on change rather than devastation Describing how humans and rivers form a symbiotic and sometimes mutually destructive relationship Coates argues that rivers illustrate the limits of human authority and that their capacity to inspire us is as strong as our ability to pollute them An intimate portrait of the way these bodies of water inform our lives *A Story of Six Rivers* will make us reconsider the streams and tributaries we traverse each day
