Advanced Topics in Term Rewriting Enno Ohlebusch, 2002-04-12 Unlike current survey articles and textbooks here the so called confluence and termination hierarchies play a key role Throughout the relationships between the properties in the hierarchies are reviewed and it is shown that for every implication $X \rightarrow Y$ in the hierarchies the property X is undecidable for all term rewriting systems satisfying Y Topics covered include the newest techniques for proving termination of rewrite systems a comprehensive chapter on conditional term rewriting systems a state of the art survey of modularity in term rewriting and a uniform framework for term and graph rewriting as well as the first result on conditional graph rewriting **Advances in Logic Based Intelligent Systems** Kazumi Nakamatsu, Jair Minoro Abe, 2005 LAPTEC 2005 promoted the discussion and interaction between researchers and practitioners focused on both theoretical and practical disciplines concerning logics applied to technology with diverse backgrounds including all kinds of intelligent systems having classical or non classical logics as underlying common matters **Recent Advances in Constraints** Angelo Oddi, François Fages, Francesca Rossi, 2009-07-28 This book constitutes the thoroughly refereed and extended post workshop proceedings of the 13th Annual ERCIM International Workshop on Constraint Solving and Constraint Logic Programming CSCLP 2008 held in Rome Italy in June 2008 The 9 revised full papers presented were carefully reviewed and selected from 14 initial submissions The papers in this volume present original research results as well as applications in many aspects of constraint solving and constraint logic programming Research topics that can be found in the papers are first order constraints symmetry breaking global constraints constraint optimization problems distributed constraint solving problems soft constraints as well as the analysis of application domains such as cumulative resource problems and hybrid systems **Advances in Computer Science and Ubiquitous Computing** Doo-Soon Park, Han-Chieh Chao, Young-Sik Jeong, James J. (Jong Hyuk) Park, 2015-12-17 This book presents the combined proceedings of the 7th International Conference on Computer Science and its Applications CSA 15 and the International Conference on Ubiquitous Information Technologies and Applications CUTE 2015 both held in Cebu Philippines December 15 17 2015 The aim of these two meetings was to promote discussion and interaction among academics researchers and professionals in the field of computer science covering topics including mobile computing security and trust management multimedia systems and devices networks and communications databases and data mining and ubiquitous computing technologies such as ubiquitous communication and networking ubiquitous software technology ubiquitous systems and applications security and privacy These proceedings reflect the state of the art in the development of computational methods numerical simulations error and uncertainty analysis and novel applications of new processing techniques in engineering science and other disciplines related to computer science **Advances in Proof Theory** Reinhard Kahle, Thomas Strahm, Thomas Studer, 2016-05-04 The aim of this volume is to collect original contributions by the best specialists from the area of proof theory constructivity and computation and discuss recent trends and results in these areas

Some emphasis will be put on ordinal analysis reductive proof theory explicit mathematics and type theoretic formalisms and abstract computations The volume is dedicated to the 60th birthday of Professor Gerhard Jäger who has been instrumental in shaping and promoting logic in Switzerland for the last 25 years It comprises contributions from the symposium Advances in Proof Theory which was held in Bern in December 2013 Proof theory came into being in the twenties of the last century when it was inaugurated by David Hilbert in order to secure the foundations of mathematics It was substantially influenced by Gödel's famous incompleteness theorems of 1930 and Gentzen's new consistency proof for the axiom system of first order number theory in 1936 Today proof theory is a well established branch of mathematical and philosophical logic and one of the pillars of the foundations of mathematics Proof theory explores constructive and computational aspects of mathematical reasoning it is particularly suitable for dealing with various questions in computer science *Advances in Computer Science - ASIAN 2004, Higher Level Decision Making* Michael Maher, Michael J. Maher, 2004-12 This book constitutes the refereed proceedings of the 9th Asian Computing Science Conference ASIAN 2004 dedicated to Jean Louis Lassez on the occasion of his 60th birthday and held in Chiang Mai Thailand in December 2004 The 17 revised full papers presented together with 3 keynote papers and 16 invited papers honouring Jean Louis Lassez were carefully reviewed and selected from 75 submissions The contributed papers are focusing on higher level decision making whereas the invited papers address a broader variety of topics in theoretical computer science *RTA 2008* Andrei Voronkov, 2008-07-04 This book constitutes the refereed proceedings of the 19th International Conference on Rewriting Techniques and Applications RTA 2008 held in Hagenberg Austria July 15-17 in June 2008 as part of the RISC Summer 2008 The 30 revised full papers presented were carefully reviewed and selected from 57 initial submissions The papers cover current research on all aspects of rewriting including typical areas of interest such as applications foundational issues frameworks implementations and semantics

Logic-Based Program Synthesis and Transformation Maurizio Gabbrielli, 2020-04-21 This book constitutes the thoroughly refereed post conference proceedings of the 29th International Symposium on Logic Based Program Synthesis and Transformation LOPSTR 2019 held in Porto Portugal in October 2019 The 15 revised full papers were carefully reviewed and selected from 32 submissions In addition to the 15 papers this volume includes 2 invited papers The symposium covers all aspects of logic based program development stages of the software life cycle and issues of both programming in the small and programming in the large This year LOPSTR extends its traditional topics to include also logic based program development based on integration of sub-symbolic and symbolic models on machine learning techniques and on differential semantics The papers are grouped into the following topics static analysis program synthesis constraints and unification debugging and verification and program transformation **Processes, Terms and Cycles: Steps on the Road to Infinity** Aart Middeldorp, 2005-12-13 This Festschrift is dedicated to Jan Willem Klop on the occasion of his 60th birthday The volume comprises a total of 23 scientific papers by close friends and colleagues written specifically for this book The papers are

different in nature some report on new research others have the character of a survey and again others are mainly expository Every contribution has been thoroughly refereed at least twice In many cases the first round of referee reports led to significant revision of the original paper which was again reviewed The articles especially focus upon the lambda calculus term rewriting and process algebra the fields to which Jan Willem Klop has made fundamental contributions Stairs 2010 Thomas Ågotnes,2011 This book contains revised versions of most of the peer reviewed papers presented at the Fifth Symposium for Artificial Intelligence Researchers STAIRS which took place in Lisbon Portugal in conjunction with the 19th European Conference on Artificial Intelligence ECAI and the Sixth Conference on Prestigious Applications of Intelligent Systems PAIS in August 2010 STAIRS is an international meeting which aims to support AI researchers from all countries at the beginning of their career and PhD students or those who have held a PhD for less than one year It offers doctoral students and young post doctoral AI fellows a unique and valuable opportunity to gain experience in presenting their work in a supportive scientific environment where they can obtain constructive feedback on the technical content of their work as well as advice on how to present it and where they can also establish contacts with the broader European AI research community The topics cover a broad spectrum of subjects in the field of AI learning and classification ontologies and the semantic web agent programming and planning logic and reasoning economic approaches games dialogue systems user preferences and recommender systems Offering an opportunity to glimpse the current work of the AI researchers of the future this book will be of interest to anyone whose work involves the use of artificial intelligence and intelligent systems
