Methodological Advances in Experimental Philosophy Eugen Fischer, Mark Curtis, 2019-03-21 Until recently experimental philosophy has been associated with the questionnaire based study of intuitions This volume brings together established and emerging research leaders from several areas of experimental philosophy to explore how new empirical methods from the behavioural sciences and digital humanities can contribute to philosophical debates Each chapter offers an accessible overview of these exciting innovations demonstrating their application in a key area of philosophy and discussing their strengths and limitations Methods covered include eye tracking virtual reality technology neuroimaging statistical learning and experimental economics as well as corpus linguistics visualisation techniques and data and text mining The volume explores their use in moral philosophy and moral psychology epistemology philosophy of science metaphysics philosophy of language philosophy of mind and the history of ideas *Methodological Advances in Experimental Philosophy* is essential reading for undergraduates graduate students and researchers working in experimental philosophy

Advances in Neurophilosophy Nora Heinzelmann, 2024-02-22 Bringing together recent case studies and insights into current developments this collection introduces philosophers to a range of experimental methods from neuroscience Chapters provide a comprehensive survey of the discipline covering neuroimaging such as EEG and MRI causal interventions like brain stimulation advanced statistical methods and approaches drawing on research into the development of human individuals and humankind A team of experts combine clear

explanations of complex methods with reports of cutting edge research advancing our understanding of how these tools can be applied to further philosophical inquiries into agency emotions enhancement perception personhood and more With contributions organised by neuroscientific method this volume provides an accessible overview for students and scholars coming to neurophilosophy for the first time presenting a range of topics from responsibility to metacognition **The Compact Compendium of Experimental Philosophy** Alexander Max Bauer,Stephan Kornmesser,2023-11-20 The relatively new movement of Experimental Philosophy applies different systematic experimental methods to further illuminate classical philosophical issues This book brings together experts from the field to give the reader a compact yet extensive overview offering a ready at hand introduction to the state of the art **The Routledge Handbook of Consciousness** Rocco J. Gennaro,2018-03-15 There has been an explosion of work on consciousness in the last 30 40 years from philosophers psychologists and neurologists Thus there is a need for an interdisciplinary comprehensive volume in the field that brings together contributions from a wide range of experts on fundamental and cutting edge topics The Routledge Handbook of Consciousness fills this need and makes each chapter s importance understandable to students and researchers from a variety of backgrounds Designed to complement and better explain primary sources this volume is a valuable first stop publication for undergraduate or graduate students enrolled in any course on Consciousness Philosophy of Mind or Philosophy of Psychology as well as a valuable handbook for researchers in these fields who want a useful reference to have close at hand The 34 chapters all published here for the first time are divided into three parts Part I covers the History and Background Metaphysics of consciousness such as dualism materialism free will and personal identity and includes a chapter on Indian philosophy Part II is on specific Contemporary Theories of Consciousness with chapters on representational information integration global workspace attention based and quantum theories Part III is entitled Major Topics in Consciousness Research with chapters on psychopathologies dreaming meditation time action emotion multisensory experience animal and robot consciousness and the unity of consciousness Each chapter begins with a brief introduction and concludes with a list of Related Topics as well as a list of References making the volume indispensable for the newcomer and experienced researcher alike **Psychological Themes in the School of Alexius Meinong** Arnaud Dewalque,Venanzio Raspa,2019-12-16 This volume addresses key aspects of the philosophical psychology elaborated by Alexius Meinong and some of his students It covers a wide range of topics from the place of psychological investigations in Meinong s unique philosophical program to his thought provoking views on perception colors Vorstellungsproduktion assumptions values truth and emotions *The Implicit Mind* Michael S. Brownstein,2018 The central contention of *The Implicit Mind* is that understanding the two faces of spontaneity its virtues and vices requires understanding the implicit mind In turn Michael Brownstein maintains that understanding the implicit mind requires the consideration of three sets of questions First what are implicit mental states What kind of cognitive structure do they have Second how should we relate to our implicit attitudes

Are we responsible for them Third how can we improve the ethics of our implicit minds Offense and Offensiveness

Andrew Sneddon,2020-11-02 This book offers a comprehensive study of the nature and significance of offense and offensiveness It incorporates insights from moral philosophy and moral psychology to rationally reconstruct our ordinary ideas and assumptions about these notions When someone claims that something is offensive others are supposed to listen Why What is it for something to be offensive Likewise it s supposed to matter if someone claims to have been offended Is this correct In this book Andrew Sneddon argues that we should think of offense as a moralized bad feeling He explains offensiveness in terms of symbolic value We tend to give claims of both offense and offensiveness more credence than they deserve While it is in principle possible for there to be genuine moral problems of offense and offensiveness we should expect such problems to be rare Offense and Offensiveness A Philosophical Account will be of interest to scholars and students working in moral philosophy and moral psychology **Selfless Minds** Monima Chadha,2023 Selfless Minds offers a new interpretation of no self metaphysics in Vasubandhu s Abhidharmakosa Bhasya Monima Chadha reads Vasubandhu as defending not only eliminativism about self but also about persons and illusionism about the sense of self and all kinds of self representation This radical no self thesis presents several challenges for Abhidharma Buddhist philosophy of mind Even if we then grant that there is no self we are left with deeper questions about the sense of self or self representations implicated in our ordinary everyday experience and thought about the world and ourselves And if we grant that there are no persons questions remain about the status of our person related concerns and interpersonal practices Selfless Minds answers these questions on behalf of the Abhidharma Buddhist The first part of the book defends the hypothesis that we can salvage much of our experience and thought without implicating self representations The second part of the book examines the revisionary implications of the no person metaphysics Some of these seem unpalatable if not downright absurd This she argues give us reason to re evaluate both the Abhidharma metaphysics and our ordinary person related practices and concerns in light of each other by using some sort of wide reflective equilibrium Selfless Minds is a contribution to cross cultural philosophy that studies the nature of selfless minds from a place at the crossroads of different traditions and disciplines philosophy in the traditional Buddhist and contemporary Western traditions and contemporary cognitive sciences
