Advances in Heterogeneous Material Mechanics 2008 Jinghong Fan, Haibo Chen, 2008 The International Conference on Heterogeneous Material Mechanics ICHMM in Huangshan China June 3-8 2008 follows the successful inaugural ICHMM held in Chongqing China in June 2004 The ICHMM series is the first international forum that focuses exclusively on various issues related to the behavior of heterogeneous materials in a broad sense The object of the ICHMM is to present and publicize integrated scientific and engineering approaches to the measurement and modeling of phenomena at the interface of materials science physics chemistry biology and solid mechanics Preface p xxxix Advances in Heterogeneous Material

Mechanics 2011 Jinghong Fan, 2011 **IUTAM Symposium on Surface Effects in the Mechanics of Nanomaterials and Heterostructures** Alan Cocks, Jianxiang Wang, 2012-09-26 This volume constitutes the proceedings of the IUTAM Symposium on Surface Effects in the Mechanics of Nanomaterials and Heterostructures held in Beijing 8-12 August 2010 The symposium brought together the most active scientists working in this area from the fields of solid mechanics composites physics and materials science and summarized the state of the art research results with a view to advancing the frontiers of mechanics and materials physics Nanomaterials and heterostructures have a large fraction of their atoms at surfaces and interfaces These atoms see a different environment to those in the interior and can have a substantial effect on the overall mechanical and physical behaviour of a material The last decade has witnessed a growing interest in the study of surfaces and how the surface behaviour couples with that of the bulk to determine the overall system response The papers in this proceedings cover extension of continuum mechanics and thermodynamics to the nano scale multiscale simulations surface effects in monolithic nano scale elements and nanostructures mechanical and physical properties of nanomaterials and heterostructures self assembly etc The surface stress effect is inherently a multidisciplinary and fertile field the Symposium truly reflects these features This IUTAM Symposium was also dedicated to Professor Bhushan L Karihaloo of Cardiff University on his impending retirement in recognition of his contributions to the fields of solid mechanics and nanomechanics and to IUTAM activities in general *Rock Mechanics: Achievements and Ambitions* Meifeng Cai, 2011-09-22 The present work provides an important stimulus for the next generation of rock engineers because in the future there will be more emphasis on the use of the Earth's resources and their sustainability and more accountability of engineers' decisions The increasing energy demand will be met by the continued operation and development of new coal mines hydroelectric plants and nuclear power stations with one or more underground nuclear waste repositories In particular enhanced methods of site investigation rock characterisation rock failure understanding computer modelling and rock excavation and support are needed Many of the 200 papers indicate that we can be confident in the continuing development of rock mechanics and r

Metallic Foam Bone Cuie Wen, 2016-11-14 *Metallic Foam Bone Processing Modification and Characterization and Properties* examines the use of porous metals as novel bone replacement materials With a strong focus on materials science
