Bereavement Counseling The Grieving Throughout The Life Cycle:

Bereavement David A. Crenshaw, 2002-08-05 Offering a wealth of information in a small amount of space Crenshaw leads his readers through the seven stages of the bereavement process noting carefully particular developmental stages in life will affect the way in which the process is handled He then gives several sensible suggestions to those who are often called to help others deal with their grief Afterwards the six major chapters of the book are devoted to the particular needs of the bereaved at each stage of the life cycle from preschooler to senior Each chapter contains accounts of typical behaviors and warning signs for which the bereaved may require more intensive or professional psychiatric help This book should prove extremely useful for those who want a practical guide for helping others handle bereavement Mary Deelev Booklist David Crenshaw wrote Bereavement for all who work with grieving children and adults It is a useful tool for those who help others through the grief process It is written in jargonless understandable language with an emphasis on practicality Crenshaw focuses upon seven tasks of mourning that he believes must be achieved in order to resolve a loss These tasks are impacted by developmental factors in differing life stages Specific grief issues of children including infants toddlers preschool and school aged children as well as teens young adults adults in midlife and elderly adults are discussed and illustrated with case examples Examples of helpful and not so helpful responses to the bereaved are also provided Crenshaw's style is down to earth and readable he attributes this to having been raised in a small farming community in Missouri where people want to know what to do and how to do it His use of case examples allows the reader to stay emotionally involved as well as clearly illustrating his points I would highly recommend this book to anyone who works with people in any capacity for all people at some time in their lives deal with grief and loss Lin Wagner Gatekeeper Outreach Coordinator Helping Bereaved Children Nancy Boyd Webb, 2011-11-04 Provides information on a variety of counseling and therapy approaches for children who have experience loss including death in the family school and community **Coping With Loss** Susan Nolen-Hoeksema, Judith Larson, Judith M. Larson, 2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love Most earlier books on bereavement have fallen into two categories distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies Each category is valuable but has tended to serve a narrow group of readers practitioners with particular theoretical orientations or researchers in quest of the latest findings Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention this book is different The authors weave together the strands of theory research and clinical wisdom into a seamless and readable narrative While they discuss previous work they also present new data never before published from one of the largest studies of bereaved people ever conducted the Bereavement Coping Project Unlike most studies to date which focused on only one type of bereaved group usually widows or widowers the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the

death The groups included those who had lost a spouse a parent an adult sibling or a child and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other The book begins with a critical overview of theories of bereavement succeeding chapters explore in depth the impact of specific types of loss the impact of particular coping strategies on recovery the impact of social supports and religion and the special cases of children and of people who seem to grow and change for the better after a loss A final chapter considers implications for intervention with bereaved people Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words

Insightful and informative Precious Heart-Broken Heart Dr. M.G. Maness,2003-01-09 I chronicle the nature of grief peculiar to divorce in a personal manner through the lens of my experience and clinical understanding I begin with love and end with love In Part One I begin with the fantasy that turned into tragedy and I use the analogy of a clock s mechanism to show the general nature and course of healthy grief especially in divorce I start with an analogy of the mechanical nature of something totally non mechanical and fully metaphysical A mainspring fulcrum lever and pendulums show how inward and outward expressions of grief facilitate or impede healing In Part Two the Black Forest Pathway How Expression Unfolds chapters III through XII a few other analogies are used to chronicle the journey through grief like the Bay of Heartbrokenness the Bridge of Finality and the Wasteland With these analogies and some liberty I take the reader on a walk through the Black Forest observing the various trees that make up grief in the various stages of a divorce In Part Three the Black Forest What Helps Expression chapters XIII and XV I step back and view the Black Forest as a whole that is in comparison with and without diminishing the grief of death I show the peculiar and greater pain of divorce All analogies have some weaknesses and there is no pretension to having chronicled every aspect Even these are but scribbles But perhaps the pictures and journey will help a little If anything I hope for an increase in sensitivity toward those going through a divorce for it can be the most traumatic and painful event in a person s life indeed life changing For more information go to www.preciousheart.net

Death and Dying John F. Silverman,Steven Nickman,2014-05-12 First published in 1996 This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased thereby freeing the survivor to reinvest in new relationships in the present Pathological grief has been defined in terms of holding on to the deceased Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do Presenting data from several populations 22 authors among the most respected in their fields demonstrate

that the health resolution of grief enables one to maintain a continuing bond with the deceased Despite cultural disapproval and lack of validation by professionals survivors find places for the dead in their on going lives and even in their communities Such bonds are not denial the deceased can provide resources for enriched functioning in the present Chapters examine widows and widowers bereaved children parents and siblings and a population previously excluded from bereavement research adoptees and their birth parents Bereavement in Japanese culture is also discussed as are meanings and implications of this new model of grief Opening new areas of research and scholarly dialogue this work provides the basis for significant developments in clinical practice in the field **Essentials of Clinical Social Work** Jerrold R.
