

Bergen Academies

Sample Test #3

This test resembles the math portion of the Bergen County Academies entrance exam, which will be given in January. Applicants are given sixty minutes to complete the 40-question test (without a calculator). In scoring, two points are given for each correct answer and one-half point is deducted for each incorrect answer. Unanswered questions are not counted. Since each question has five possible answers, this means that random guessing will, on the average, neither help nor hurt your score.

The answers are:

D1 - 10	A B A B C	C C C E E
11 - 20	E A E B A	A C D B E
21 - 30	C B B A E	E C B C C
31 - 40	E E C E C	C E E E E

Competitive Dynamics of Entrepreneurial Market Entry Gideon Markman, Phillip H. Phan, 2011 Research on general market entry usually focuses on large enterprises. Often however, small entrants can alter the competitive dynamics of an industry. This volume brings together the most prominent thought leaders and the best research on the asymmetric entrant/incumbent dynamics. The ideas presented offer a more nuanced perspective on how, when, where, and with what consequences small, single-product firms enter markets that are dominated by large, multiproduct and multimarket incumbents. Large enterprises often enjoy a number of advantages that young, small ventures, as well as matured but still small firms, lack. These differences manifest not only in how large and small firms operate and in their resource capability mix but also in how they compete and interact with each other. Research on general market entry and competitive dynamics is extensive yet it focuses on entrants and incumbents that are of similar profile, similar size, comparable asset mixes, related product strategies, and equivalent organizational capabilities. The unique contribution of this volume is its concentration on asymmetric entrant/incumbent dynamics. Scholars and students in entrepreneurship, strategy, international business, and related fields will find this excellent collection of key published and original material illuminating.

Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1) widespread adolescent underachievement is not susceptible to solution by educational interventions, no matter how much money is allocated to public education, and 2) there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K-12 and college to solve a growing social problem. Many policy makers seem to think that teachers/schools are the primary cause of low achievement. Educational institutions still cannot solve a non-education-caused problem and haven't done so for over fifty years, despite all the public and private money that has been allocated. The book concludes with suggested policies for addressing the damage to public education from gap-closing standards and with suggested areas for policy making in order to change the current course of failure for many low-achieving students.

Annapolis Goes to War Craig L. Symonds, 2025-05-05 America's preeminent naval historian offers a history of the Second World War based on the experiences of the young officers fresh out of the United States Naval Academy who served on its front lines. They arrived in Annapolis as teenagers the year Hitler re-occupied the Rhineland and graduated as young men the week the British Army evacuated Dunkirk. *Annapolis Goes to War*

tells the story of their four transformative years at the Naval Academy and then four more annealing years in the cauldron of war. More than a hundred of them were on duty in Pearl Harbor on December 7, 1941. Ten of them died that day; seven remain entombed in the USS Arizona still. Over the next four years, these former Midshipmen participated in virtually every significant engagement in both the Atlantic and the Pacific, from Pearl Harbor to Tokyo Bay, from North Africa to Normandy. They were at the front edge of the war in battleships, carriers, destroyers, submarines, and airplanes, and led Marine Corps units ashore. Some experienced the war as prisoners of the Japanese. Fifty-six of them died in the Second World War, the greatest wartime loss any service academy ever experienced. Taking readers into and through the lives of these young men in wartime, Craig Symonds offers a poignant and powerful story of adjustment, growth, pain, loss, and eventually triumph. Using their diaries, memoirs, and letters, he evokes unforgettably their trials and bonds, their loss of innocence and their discovery of the meaning of sacrifice. Annapolis Goes to War is essential reading for anyone seeking to understand the experience of fighting the bloodiest war in human history.
