Biology 54 Community Ecology Guide:

Community Ecology Gary G. Mittelbach, Brian J. McGill, 2019-05-24 Community ecology has undergone a transformation in recent years from a discipline largely focused on processes occurring within a local area to a discipline encompassing a much richer domain of study including the linkages between communities separated in space metacommunity dynamics niche and neutral theory the interplay between ecology and evolution eco evolutionary dynamics and the influence of historical and regional processes in shaping patterns of biodiversity To fully understand these new developments however students continue to need a strong foundation in the study of species interactions and how these interactions are assembled into food webs and other ecological networks This new edition fulfils the book s original aims both as a much needed up to date and accessible introduction to modern community ecology and in identifying the important questions that are yet to be answered This research driven textbook introduces state of the art community ecology to a new generation of students adopting reasoned and balanced perspectives on as yet unresolved issues Community Ecology is suitable for advanced undergraduates graduate students and researchers seeking a broad up to date coverage of ecological concepts at the community level

The Chicago Guide to Landing a Job in Academic Biology C. Ray Chandler, Lorne M. Wolfe, Daniel E. L. Promislow, 2008-09-15 The Chicago Guide to Landing a Job in Academic Biology is an indispensable guide for graduate students and post docs as they enter that domain red in tooth and claw the job market An academic career in the biological sciences typically demands well over a decade of technical training So it s ironic that when a scholar reaches the most critical stage in that career the search for a job following graduate work he or she receives little or no formal preparation Instead students are thrown into the job market with only cursory guidance on how to search for and land a position Now there s help Carefully clearly and with a welcome sense of humor The Chicago Guide to Landing a Job in Academic Biology leads graduate students and postdoctoral fellows through the perils and rewards of their first job search The authors who collectively have for decades mentored students and served on hiring committees have honed their advice in workshops at biology meetings across the country The resulting guide covers everything from how to pack an overnight bag without wrinkling a suit to selecting the right job to apply for in the first place The authors have taken care to make their advice useful to all areas of academic biology from cell biology and molecular genetics to evolution and ecology and they give tips on how applicants can tailor their approaches to different institutions from major research universities to small private colleges With jobs in the sciences ever more difficult to come by The Chicago Guide to Landing a Job in Academic Biology is designed to help students and post docs navigate the tricky terrain of an academic job search from the first year of a graduate program to the final negotiations of a job offer
