1. INTRODUCTION

The Bendix® TABS-6™ Advanced MC module is an integrated multi-channel (4S/2M) trailer service brake module controller for air-braked heavy-duty semi-trailers that features Bendix® Antilock Brake System (ABS) and Bendix® Trailer Roll Stability Program (TRSP®).

Installed on semi-trailers, the module acts as a relay valve during normal braking, but during ABS events it will intervene to help maintain vehicle stability and minimize stopping distance by preventing wheel lock-up. The Bendix TRSP monitors the trailer's motion and reduces the risk of roll overs by automatically applying the brakes when a risk of roll over is detected.

This module features:

- A modular design with an integrated Electronic Control Unit (ECU); pressure sensors; a lateral acceleration sensor; and Modulator Relay Valves (MRVs) – eliminating external pigtail harnesses for these components.
- An operating voltage range of 8 - 32 volts.
- An electronic odometer with trip counters & service interval options.
- A scratch-pad feature with up to 1,008 bytes of freely definable read/write text space available for customer use.
- An extended data logging feature, including a resettable drive recorder.
