**Bereavement and Commemoration** Sarah Tarlow, 1999-08-25 This book provides an historical archaeology of death burial and bereavement from the Reformation to the present

**The Oxford Handbook of the Archaeology of Death and Burial** Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 This Handbook reviews the state of mortuary archaeology and its practice with forty four chapters focusing on the history of the discipline and its current scientific techniques and methods Written by leading scholars in the field it derives its examples and case studies from a wide range of time periods and geographical areas

**The Archaeology of Death in Post-medieval Europe** Sarah Tarlow, 2015-01-01 Historical burial grounds are an enormous archaeological resource and have the potential to inform studies not only of demography or the history of disease and mortality but also histories of the body of religious and other beliefs about death of changing social relationships values and aspirations In the last decades the intensive urban development and a widespread legal requirement to undertake archaeological excavation of historical sites has led to a massive increase in the number of post medieval graveyards and burial places that have been subjected to archaeological investigation The archaeology of the more recent periods which are comparatively well documented is no less interesting and important an area of study than prehistoric periods This volume offers a range of case studies and reflections on aspects of death and burial in post medieval Europe Looking at burial goods the spatial aspects of cemetery organisation and the way that the living interact with the dead contributors who have worked on sites from Central North and West Europe present some of their evidence and ideas The coherence of the volume is maintained by a substantial integrative introduction by the editor Professor Sarah Tarlow This book is a first and a necessary one It is an exciting and far ranging collection of studies on post medieval burial practice across Europe that will most certainly be used extensively Professor Howard Williams

**Mortuary Monuments and Burial Grounds of the Historic Period** Harold Mytum, 2012-12-06 Burial grounds strike an immediate chord with all who visit them They are land scapes full of pathos and cultural associations which many find attractive though a minority feel are too morbid to deserve detailed attention This book is designed to offer a framework for studying historic burial ground monuments and contains a certain amount of information regarding below ground archaeology as some projects will involve the study of both Moreover from a research perspective above and below ground archaeology together can throw considerable light on the process of dying body disposal and commemoration that formed a continuum for those involved However the more easily accessible graveyard memorials can be used to study many aspects of past culture beyond that directly associated with death and they are the focus of the book Most people who become interested in historic graveyard memorials come to the subject via the material itself Only rarely does a research question get posed and graveyard data seem like an appropriate arena for investigation This has the advantage that many researchers have some ideas about the data available but the disadvantage that they may not have clear questions to ask of it nor how to set their discoveries in a wider intellectual context

*Death embodied* Zoë L.

Devlin, Emma-Jayne Graham, 2015-06-30 In April 1485 a marble sarcophagus was found on the outskirts of Rome It contained the remains of a young Roman woman so well preserved that she appeared to have only just died and the sarcophagus was placed on public view attracting great crowds Such a find reminds us of the power of the dead body to evoke in the minds of living people be they contemporary survivors or mourners or distanced from the remains by time a range of emotions and physical responses ranging from fascination to fear and from curiosity to disgust Archaeological interpretations of burial remains can often suggest that the skeletons which we uncover and therefore usually associate with past funerary practices were what was actually deposited in graves rather than articulated corpses The choices made by past communities or individuals about how to cope with a dead body in all of its dynamic and constituent forms and whether there was reason to treat it in a manner that singled it out positively or negatively as different from other human corpses provide the stimulus for this volume The nine papers provide a series of theoretically informed but not constrained case studies which focus predominantly on the corporeal body in death The aims are to take account of the active presence of dynamic material bodies at the heart of funerary events and to explore the questions that might be asked about their treatment to explore ways of putting fleshed bodies back into our discussions of burials and mortuary treatment as well as interpreting the meaning of these activities in relation to the bodies of both deceased and survivors and to combine the insights that body centered analysis can produce to contribute to a more nuanced understanding of the role of the body living and dead in past cultures

**The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century** Alasdair Brooks, 2016 Britain was the industrial and political powerhouse of the nineteenth century the birthplace of the Industrial Revolution and the center of the largest empire of the time With its broad imperial reach and even broader indirect influence Britain had a major impact on nineteenth century material culture worldwide Because British manufactured goods were widespread in British colonies and beyond a more nuanced understanding of those goods can enhance the archaeological study of the people who used them far beyond Britain's shores However until recently archaeologists have given relatively little attention to such goods in Britain itself thereby missing what is often revealing and useful contextual information for historical archaeologists working in countries where British goods were consumed while also leaving significant portions of Britain's own archaeological record poorly understood The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century helps fill these gaps through case studies demonstrating the importance and meaning of mass produced material culture in Britain from the birth of the Industrial Revolution mid 1700s to early World War II By examining many disparate items such as ceramics made for export various goods related to food culture Scottish land documents and artifacts of death these studies enrich both an understanding of Britain itself and the many places it influenced during the height of its international power
