Bernard Tschumi Event Cities 3:

Event-Cities 3 Bernard Tschumi, 2005-04-01 How concept context and content interact in architecture provocative examples from recent projects by Bernard Tschumi In Event Cities 3 Bernard Tschumi explores the complex and productive triangulation of architectural concept context and content There is no architecture without a concept an overriding idea that gives coherence and identity to a building But there is also no architecture without context historical geographical cultural or content what happens inside Concept context and content may be in unison or purposely discordant Against the contextualist movement of the 1980s and 1990s which called for architecture to blend in with its surroundings Tschumi argues that buildings may or may not conform to their settings but that the decision should always be strategic Through documentation of recent projects including the new Acropolis Museum in Athens a campus athletic center in Cincinnati museums in Sao Paulo New York and Antwerp concert halls in France and a speculative urban project in Beijing Tschumi examines different ways that concept context and content relate to each other in his work In the new Acropolis Museum for example Tschumi looks at the interaction of the concept a simple and precise museum with the clarity of ancient Greek buildings with the context its location at the base of the Acropolis 800 feet from the Parthenon and the content which incorporates archaeological excavations on the building site into the fabric of the museum Through provocative examples Tschumi demonstrates that the relationship of concept context and content may be one of indifference reciprocity or conflict all of which he argues are valid architectural approaches Above all he suggests that the activity of architecture is less about the making of forms than the investigation and materialization of concepts

Event-Cities 5 Bernard Tschumi, 2024-11-12 An essential resource on the work of Bernard Tschumi Architects with a focus on how concept context and program intersect with intuition in singular and unexpected ways Event Cities 5 is the fifth and final volume in the MIT Press series documenting recent built and unbuilt projects by renowned architect Bernard Tschumi This volume expands on the theoretical preoccupations that have shaped Tschumi's work in practice and pedagogy In this volume Tschumi embarks on what he calls a poetics that addresses both the rational elaboration of work and the irrational eruption of inexplicable elements in architectural projects How do chance intuition and analogy among other elements intersect with the logical play of concept context and program to generate innovative and informed design Highlights of this volume include circular building projects works with suspended gardens and floating rectangular masses superposed structures created via surrealist tactics an immense educational research complex in France that hovers between building and urban design a museum in China made from intersecting conic shapes and a project for a cultural center in Italy that is structured as an investigation into courtyards and facades The book features nearly 30 projects developed over the last fifteen years and highlights Tschumi's longstanding interest not only in producing conceptual clarity but in questioning architecture itself

Event-Cities 4 Bernard Tschumi, 2010-09-03 Tschumi introduces the concept form a concept generating a form or a form

generating a concept Event Cities 4 is the latest in the Event Cities series from Bernard Tschumi documenting recent built and theoretical projects in the context of his evolving views on architecture urbanism and design Event Cities C4 follows directly from the work of Event Cities 3 which examined the interaction of architectural content concept and context This volume takes the interaction a step further looking at a series of projects for which program or context are insufficient as a generative conceptual strategy hence requiring a different approach Tschumi has said Over the past years there is one word I have almost never used except in order to attack it form In Event Cities 4 Tschumi introduces the concept form a concept generating a form or a form generating a concept so that one reinforces the other The concept may be programmatic technological or social The form may be singular or multiple regular or irregular Concept forms act as organizing devices or common denominators for the multiple dimensions of programs and their evolution over time and drive the projects featured in this book Highlights include master plans for a pair of media based work spaces and cultural campuses in Singapore and Abu Dhabi a major master plan for a financial center with 40 000 projected inhabitants in the Dominican Republic the innovative Blue Residential Tower in New York City a group of museums and cultural buildings in France Abu Dhabi Dubai and South Korea a pedestrian bridge in France and a multi programmatic furniture piece the TypoLounger The book contains more than twenty of the Tschumi firm s recent projects showcasing the most current and forward looking designs of one of the world s leading architectural practices

The Dissolution of Place Shelton Waldrep, 2016-03-16 Postmodern architecture with its return to ornamentality historical quotation and low culture kitsch has long been seen as a critical and popular anodyne to the worst aspects of modernist architecture glass boxes built in urban locales as so many interchangeable generic anti architectural cubes and slabs This book extends this debate beyond the modernist postmodernist rivalry to situate postmodernism as an already superseded concept that has been upended by deconstructionist and virtual architecture as well as the continued turn toward the use of theming in much new public and corporate space It investigates architecture on the margins of postmodernism those places where both architecture and postmodernism begin to break down and to reveal new forms and new relationships The book examines in detail not only a wide range of architectural phenomena such as theme parks casinos specific modernist and postmodernist buildings but also interrogates architecture in relation to identity specifically Native American and gay male identities as they are reflected in new notions of the built environment In dealing specifically with the intersection between postmodern architecture and virtual and filmic definitions of space as well as with theming and gender and racial identities this book provides ground breaking insights not only into postmodern architecture but into spatial thinking in general

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and

21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics Theoretical Meltdown

Luigi Prestinenza Puglisi, 2009-02-17 If the 20th century can be characterised by theories and manifestoes which emanated across every sphere of life from politics to the fine arts the beginning of the 21st century can be distinguished by its very break from theory This effective theoretical meltdown has manifested itself in a period of uncertainty which can be perceived in the way disciplines coalesce with each other and blur their parameters fine art becoming indistinct from advertising imagery architecture incorporating communication techniques and sculpture dealing with living spaces while architecture reshapes fragments of the natural environment The issue topically calls the contemporary situation in architecture to account Features writings by and interviews with some of the most remarkable protagonists of the debate Ole Bouman Ricardo Diller Elizabeth Scofidio Neil Leach Bernard Tschumi and Robert Venturi and Denise Scott Brown Acts as a barometer to architectural design inviting 10 international critics to highlight the most relevant current work **Echoes in**

Perspective-Essays on Architecture Daniel Pavlovits, 2015-05-29 One could read the collection of essays herein as a political voice to architecture and the architecture profession constantly gnawing away at the disciplinary only to find favor in the imaginative intellectually interesting and the creative Beyond embodying a collection of thought on architecture and its discipline the present collection of essays also serves as a not so veiled political program for the possibility of architecture

The Architecture of Art Museums Ronnie Self, 2014-04-16 As a building type art museums are unparalleled for the opportunities they provide for architectural investigation and experimentation They are frequently key components of urban revitalization and often push the limits of building technology Art museums are places of pleasure education and contemplation They are remarkable by their prominence and sheer quantity and their lessons are useful for all architects and for all building types This book provides explicit and comprehensive coverage of the most important museums built in the first ten years of the 21st Century in the United States and Europe By dissecting and analyzing each case Ronnie Self allows the reader to get under the skin of each design and fully understand the process behind these remarkable buildings Richly

designed with full technical illustrations and sections the book includes the work of Tadao Ando Zaha Hadid Peter Cook Colin Fournier Renzo Piano Yoshi Taniguchi Herzog de Meuron Jean Nouvel SANAA Daniel Libeskind Diller Scofidio Renfro Steven Holl Coop Himmelblau Bernard Tschumi Sauerbruch Hutton and Shigeru Ban Jean de Gastines Together these diverse projects provide a catalogue of design solutions for the contemporary museum and a snapshot of current architectural thought and culture One of few books on this subject written by an architect Self's analysis thoroughly and critically appraises each project from multiple aspects and crucially takes the reader from concept to building This is an essential book for any professional engaged in designing a museum

Tschumi on Architecture Enrique Walker, Bernard Tschumi, 2006 Architect and educator Bernard Tschumi is one of the most influential figures in architectural theory and practice This fascinating volume presents in a sequence of ten conversations his autobiography in architecture from his conceptual proposals of the early 1970s through his major current buildings and projects Tschumi approaches his work as the gradual construction of an argument The conversations drawn from a six year series of interviews with critic Enrique Walker represent that argument in an analysis of Tschumi's writings buildings and other works The conversations offer a clear eyed analysis of Tschumi's work suggesting the interwoven relationship between the strategies of each individual design and the formation of the architect's overarching theoretical project Among the major works of architecture investigated are Parc de la Villette in Paris Le Fresnoy National Studio for Contemporary Arts in Tourcoing France and the New Acropolis Museum in Athens Also included are Tschumi's conceptual works and writings such as *The Manhattan Transcripts* and *Architecture and Disjunction*

Animate(d) Architecture Vahid Vahdat, 2024-03-25 At their peak architectural marvels such as the Sagrada Família the Tower of London the Mosque Cathedral of Córdoba and the Eiffel tower had a combined annual visit of almost 164 million people The animated icebound castle in Disney's 2019 *Frozen* had 116.4 million views from one single YouTube trailer in less than 24 hours The spaces of such massively consumed animation have for generations informed the architectural imagination of people across the globe and from very early in their lives Yet not only have the architectural disciplines remained rather absent in the design of these massively consumed spaces architectural theory has likewise failed to articulate a framework to approach the architecture of animation To address this void this book offers an interdisciplinary approach to survey the role of space in animation including in creating humorous moments in early cartoon shorts generating action and suspense in Japanese anime and even stimulating erotic pleasure in pornographic Hentai Exploring the imagined architecture of animation from early motion picture to digital animation and from computer graphics to game engines offers an analytical frame to reconceptualize space An Open Access version of Yuko Yoshida's chapter *Animated Embodiments of Witnessing An Architectural Narrative of Silence* is available on the Liverpool University Press website
