

BIOMES

LANEY LEE

BIOMES

Take a closer look at the images above. Each is home to a variety of plants and animals, but no two are the same. Although they're all capable to life, there are quite a lot of differences too. Many of these differences are **abiotic**, or have to do with the non-living parts of the environment. Abiotic factors include temperature, the amount of oxygen in the air or water, and the kind of soil present.

infer, or make your best guess, about some of the abiotic factors in each of the images.

Location	Temperature	Amount of rainfall
A		
B		
C		

Specifying these locations are all home to many trees, or living, factors as well. What kinds of species do you think live in each of these places? Feel free to list plants, animals, birds, fish, insects, and even microscopic life like bacteria!

Location	Species Living There
A	

BIOMES

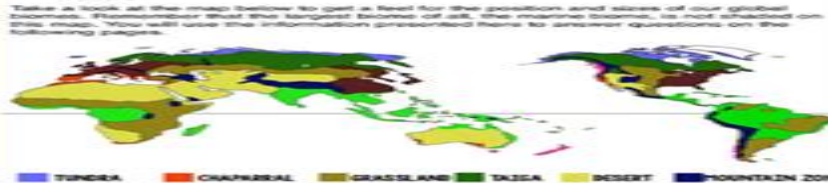

Chaparral

Tundra

Lastly, the **chapparral** biome is a coastal biome with hot, dry summers and mild winters. It has mostly shrubs with a few short trees. Deer, birds, and rabbits live in the chaparral.

Tundra When we think of deserts, we usually think of a hot and dry place, but did you know that deserts can be cold too? The **Tundra** in Alaska is the largest cold desert, but there is so much snow (and) that it's still considered a desert. Both plants and animals must adapt to dry life in the desert. Many develop unique ways of surviving such as water storage.

BIOMES

Answer the following questions using the world map.

1. Which land biome is the largest?
2. Which continents have this biome on them?
3. Which continent has the most different biomes?
4. What biomes does it have?
5. Name 3 biomes present in Africa.
6. Name 3 continents with mountain forests.

BIOMES

7. Where is the tundra?
8. Where is the chaparral?
9. Based on the biomes, which biome is the most diverse?
10. Which biome is the most arid?
11. Which biome is the most temperate?
12. Which biome is the most humid?
13. Name another biome.

Biome	Weather/Climate	Plants & Animals	Geographic Location(s)
Marine			
Freshwater			
Savanna			
Temperate Grassland			

BIOMES

Temperate Grassland

Desert

Forest

Tundra

extremely nutrient rich soil. Here you'll find a variety of plants and animals. Due to their dry and hot climate, plants in both savanna and grasslands are adapted to survive relatively common fires.

Desert When we think of deserts, we usually think of a hot and dry place, but did you know that deserts can be cold too? The **Desert** in Alaska is the largest cold desert, but there is so much snow (and) that it's still considered a desert. Both plants and animals must adapt to dry life in the desert. Many develop unique ways of surviving such as water storage or the ability to remain dormant (similar to hibernation) for a long time.

Forest There are several different kinds of forest biomes, including: The **rainforest** is most likely the most famous forest. This lush biome is home to a vast number of plants and animals. The average height of a tree in a rainforest is 1000 cm (400 inches). Rainforests are home to a wide variety of plants and animals. Here you can find parrots, sloths, and many other species.

The **temperate forest** is common in the US, Canada, Europe, and Asia. Here you'll find deciduous trees that lose their leaves in the winter. In fact, that's what this biome is famous for: it's a unique place where the trees lose their leaves. These forests are home to a variety of plants and animals. Here you can find bears, deer, and many other species. The **taiga** is a colder forest with cone-bearing, coniferous trees. These forests are found in Northern Canada and Russia. The days are long in the summer and short in the winter due to the tilt of the Earth's axis, so the trees are evergreen.

BIOMES

Earth is an amazing planet. It has many different environments that make perfect homes for millions of species. The largest major habitats that exist worldwide are known as **biomes**. Most likely, you're familiar with many of these: desert, rainforest, grassland, etc. Each biome is unique and has its own set of characteristics that make it different from the others. One of the most important factors in maintaining biodiversity, or the amazing variety of life, that makes our Earth so abundant in species and resources.

How many biomes are there? Do all water environments constitute a single aquatic biome? Are all fire-filled ecosystems considered a forest biome? The number of biomes you could simply depend on how specific you'd like to be. Let's take a look at some of the largest biomes, and the abiotic and biotic factors that define them.

Marine

Freshwater

Savanna

Aquatic Biomes Since water covers over 70% of the Earth, the largest biomes are the aquatic biomes. Marine aquatic biomes include coral reefs and estuaries, but the two major ones are the marine and freshwater biomes. The **marine** biome, made up of the world's oceans, is so big it's usually divided into smaller biomes. Estuaries, or the areas where the ocean meets the land, are actually a times larger than all of Earth's other biomes combined. The movement of water in the marine biome creates ocean currents which play a major role in creating weather. Smaller **freshwater** biomes consist of lakes, ponds, and rivers. These are often part of the marine biomes because they do not contain salt. Freshwater biomes are especially important to us humans as they provide the water that we use to drink. All aquatic biomes provide homes for diverse plant and animal life. Fish, whales, and other aquatic species.

Grassland Grassland biomes live up to their name! They're made up of open and very few trees. The two major grassland biomes are the **savanna** and **temperate grassland**. The **savanna** is a warm biome that covers half of Africa and large parts of Australia. These areas have a 6-8 month wet season in the summer and a dry season in the winter. Elephants, giraffes, and other animals live in the savanna. The **temperate grasslands**, on the other hand, make up the plains of middle America.

BIOMES

Answer the following questions using the world map.

1. What is a biome?
2. Is weather a biotic factor or an abiotic factor? How do you know?

could find in a marine ecosystem.

marine and freshwater ecosystems.

it **adapt** (or change) to survive. For example, polar bears have to keep their bodies warm in their cold environment. What animals need to survive in the desert?

the biome including the plants, animals, and landforms.

Biome Study Guide High School Introduction

In the digital age, access to information has become easier than ever before. The ability to download Biome Study Guide High School has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Biome Study Guide High School has opened up a world of possibilities. Downloading Biome Study Guide High School provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Biome Study Guide High School has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Biome Study Guide High School. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Biome Study Guide High School. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Biome Study Guide High School, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Biome Study Guide High School has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of

continuous learning and intellectual growth.

FAQs About Biome Study Guide High School Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Biome Study Guide High School is one of the best book in our library for free trial. We provide copy of Biome Study Guide High School in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Biome Study Guide High School. Where to download Biome Study Guide High School online for free? Are you looking for Biome Study Guide High School PDF? This is definitely going to save you time and cash in something you should think about.
