Computer Methods in Biomechanics and Biomedical Engineering II Wafa Skalli, Sébastien Laporte, Aurélie Benoit, 2024-04-23 This book gathers selected extended and revised contributions to the 18th International Symposium on Computer Methods in Biomechanics and Biomedical Engineering held on May 3 5 2023 at Arts Et Métiers Institute Of Technology in Paris France They highlight cutting edge advances in computational modelling in biomedical engineering discusses new developments on imaging and visualization as well as solutions for applying them in the clinical practice All in all this book offers a timely snapshot of the latest research and current challenges at the interface between biomedical engineering computational biomechanics and biological imaging It also aims at fostering future cross disciplinary collaborations Maternal and Newborn Success Nancy Beck Irland, 2021-11-17 Assure your mastery of maternal and newborn nursing knowledge while honing your critical thinking and test taking skills Over 1 160 NCLEX style questions on maternal and newborn nursing care reflect the latest test plan including the more difficult SATA format Rationales for correct and incorrect responses as well as test taking tips help you to critically analyze the question types Together with a comprehensive exam at the end of the book they provide the practice you need to build your confidence for course exams and the NCLEX Dynamic Positions in Birth Margaret Jowitt, 2014-03-11 Most women give birth in hospitals institutions

modelled around the needs of the people who work there The delivery room is designed around the obstetric bed which was designed for the benefit of the obstetrician rather than the woman giving birth Despite research showing the benefit of upright positions in labour and birth most women in the UK still give birth in the semi reclined position pushing their baby out against the forces of gravity The author argues that unnatural positions make labour and birth more painful and difficult for modern women than it was for their ancestors How did we come to put the needs of care givers above those of the labouring woman Is there anything that can be done Starting with a short history of birth furniture *Dynamic Positions in Birth* goes on to explore the anatomy and physiology of labour from an evolutionary perspective and explores how rethinking positions for labour and birth could benefit mothers and their babies Equally important is the need to change attitudes to birth so that women are encouraged to play a more active part in the birth of their babies instead of being subjected to clinical interventions designed to mitigate the adverse effects of labouring in a starkly unnatural environment Margaret Jowitt argues that it is possible to give women labouring in hospital a better chance of giving birth naturally The book concludes by calling for a fresh look at the environment for birth Delivery rooms can be made more user friendly by introducing furniture designed around women s need for physical support during labour as well as for the birth and by hiding away the more alarming technology unless it is needed Women need a less forbidding environment and more encouragement to move freely and adopt positions which will enhance their chance of achieving a normal birth
