Biopolitics and the Emergence of Modern Architecture Sven-Olov Wallenstein, 2012-11-28 Biopolitics and the Emergence of Modern Architecture concerns the dissolution of the classical paradigm of architecture as imitative form in the context of the French Enlightenment and analyzes the emergence of a new logic of architecture based on a biopolitical process of subject formation Published shortly after the release of the first English translation of Foucault's *The Birth of Biopolitics* this is the first volume that specifically relates the biopolitical concept to architecture **Bernard Stiegler and the Philosophy of Education II** Joff P. N. Bradley, 2023-08-22 This is the second volume of research into the philosophy of Bernard Stiegler and its interconnections with the philosophy of education Building on the first edited collection Stiegler's philosophy is introduced to scholars in the field of the philosophy of education in the hope that researchers dig deep into his philosophy and apply it to their own educational context in order to produce new forms of knowledge that is negentropic forms of knowledge which may counter the endemic crises we see in educational institutions in towns cities and villages across the planet This second volume throws down the gauntlet to others to find new ways to contest toxic forms of digital life inside and outside education and to challenge entrenched and conservative ways of teaching and learning in the 21st century The writers in this volume from Australasia Europe and across South Southeast and East Asia do a remarkable job of translating Bernard Stiegler's sometimes complicated language into ways which are interpretable applicable and communicable to those who witness day in day out in their schools universities and institutions the struggle to capture the hearts and minds of young people This book was originally published as a special issue of the journal *Educational Philosophy and Theory* **Kay Fisker** Martin Sørberg, 2021-05-20 Kay Fisker 1893 1965 is considered one of the most influential Danish architects of the twentieth century and yet there has existed until now no in depth English language study of his works and writing Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this book examines Fisker's key projects from his early railway stations and innovative housing projects to the Danish Academy in Rome and analyses his work as a historian and writer Fisker's output is closely associated with the functional tradition a hybridization of international modernism and regional architectural typologies and this book shows how his architectural poetics can be understood as an amalgamation of an ideal order with the contingent conditions of landscapes and urban sites Hybridization is not only a valuable notion for understanding Fisker the book argues it can also be applied to an understanding of modernist architecture as a whole with its various expressions agendas and tensions both regionally and internationally [A Genealogy of Tropical Architecture](#) Jiat-Hwee Chang, 2016-04-28 *A Genealogy of Tropical Architecture* traces the origins of tropical architecture to nineteenth century British colonial architectural knowledge and practices It uncovers how systematic knowledge and practices on building and environmental technologies in the tropics were linked to military technologies medical theories and sanitary practices and

were manifested in colonial building types such as military barracks hospitals and housing It also explores the various ways these colonial knowledge and practices shaped post war techno scientific research and education in climatic design and modern tropical architecture Drawing on the interdisciplinary scholarships on postcolonial studies science studies and environmental history Jiat Hwee Chang argues that tropical architecture was inextricably entangled with the socio cultural constructions of tropical nature and the politics of colonial governance and postcolonial development in the British colonial and post colonial networks By bringing to light new historical materials through formidable research and tracing the history of tropical architecture beyond what is widely considered today as its founding moment in the mid twentieth century this important and original book revises our understanding of colonial built environment It also provides a new historical framework that significantly bears upon contemporary concerns with climatic design and sustainable architecture This book is an essential resource for understanding tropical architecture and its various contemporary manifestations Its in depth discussion and path breaking insights will be invaluable to specialists academics students and practitioners
