Indigenous Cultural Translation Darryl Sterk,2020-05-01 Indigenous Cultural Translation is about the process that made it possible to film the 2011 Taiwanese blockbuster Seediq Bale in Seediq an endangered indigenous language Seediq Bale celebrates the headhunters who rebelled against or collaborated with the Japanese colonizers at or around a hill station called Musha starting on October 27 1930 while this book celebrates the

grandchildren of headhunters rebels and collaborators who translated the Mandarin language screenplay into Seediq in central Taiwan nearly eighty years later As a thick description of Seediq Bale this book describes the translation process in detail showing how the screenwriter included Mandarin translations of Seediq texts recorded during the Japanese era in his screenplay and then how the Seediq translators backtranslated these texts into Seediq changing them significantly It argues that the translators made significant changes to these texts according to the consensus about traditional Seediq culture they have been building in modern Taiwan and that this same consensus informs the interpretation of the Musha Incident and of Seediq culture that they articulated in their Mandarin Seediq translation of the screenplay as a whole The argument more generally is that in building cultural consensus indigenous peoples like the Seediq are translating their traditions into alternative modernities in settler states around the world

Of Bridges Thomas Harrison,2021-04-01 Offers a philosophical history of bridges both literal bridges and their symbolic counterparts and the acts of cultural connection they embody Always wrote Philip Larkin it is by bridges that we live Bridges represent our aspirations to connect to soar across divides And it is the unfinished business of these aspirations that makes bridges such stirring sights especially when they are marvels of ingenuity A rich compendium of myths superstitions and literary and ideological figurations Of Bridges organizes a poetic and philosophical history of bridges into nine thematic clusters Leaping in lucid prose between distant times and places Thomas Harrison questions why bridges are built and where they lead He probes links forged by religion between life s transience and eternity as well as the consolidating ties of music illustrated by the case of the blues He investigates bridges in poetry as flash points in war and the megabridges of our globalized world He illuminates real and symbolic crossings facing migrants each day and the affective connections that make persons and societies cohere In readings of literature film philosophy and art Harrison engages in a profound reflection on how bridges form and transform cultural communities Of Bridges is a mesmerizing vertiginous tale of bridges both visible and invisible both lived and imagined
