

A/C COMPRESSOR REPLACEMENT CHECKLIST

You will void the compressor warranty if you do not perform the following checklist prior to the vehicle leaving your facility!

ALWAYS PERFORM THE FOLLOWING CHECKS:

- ☒ Remove the compressor clutch at least 4 times, prior to installation on the vehicle. If not, use to rotate by hand. A Delphi turning tool (C510540) or equivalent device must be used. Do not use a socket directly on the shaft nut or bolt.
- ☒ Install a new Delphi or OEM equivalent sealant prior to disassembling the compressor on the vehicle.
- ☒ On service tube systems, install a new drier tube. On expansion valve systems, clean the expansion valve and orifice or replace the expansion valve.
- ☒ Ensure the A/C system is clean. Closed loop refrigerant flushing is recommended. If chemical flushing is used, all chemical flushing agents must be removed from the system.
- ☒ Do not put any additional chemicals in system (including into the A/C system). Leak detection dyes, in proper amounts, are acceptable.
- ☒ Use the correct type and amount of refrigerant lubricant. Refer to the instruction sheet contained in this kit.

If you have questions regarding the warranty or installation process, please contact Delphi at 1.877.GO.DELPHI.

INSTRUCTIONS
