Management of Urban Water Resources Susanne Charlesworth,Craig Lashford,2021-01-28 It is well known that 55% of the world s population currently lives in urban areas and this figure is predicted to grow to 68% by 2050 adding more than 2 5 billion people to urban populations It is also projected that there will be 43 megacities worldwide by 2030 with populations of more than 10 million inhabitants The United Nations World Water Development Report 2018 warned that by 2030 the global demand for fresh water is likely to exceed supply by 40% Added to population growth climate change has the potential to lead to changes in rainfall regimes with the potential of increased flooding and drought Currently 1 2 billion people are at risk from flooding but this is predicted to increase to about 1 6 billion i e nearly 20% of the total world population by 2050 In line with this replacing deteriorating water management infrastructure that can no longer cope is economically unfeasible impracticable from a construction point of view and likely to fail in the long term To address these issues approaches are needed that are flexible and have multiple benefits In its World Water Development Report 2018 the UN promotes the use of nature based solutions to some of these problems with the focus of Sustainable Development Goal 6 making sure that everyone has access to a safe and affordable supply of potable water and sanitation by 2030 requiring investment in suitable infrastructure across the world This Special Issue covers the challenges faced in managing urban water in all its forms from potable supplies to reuse and harvesting as well as resilient and sustainable approaches developed to address flooding and drought *Colormute* Mica Pollock,2009-04-11 This book considers in unprecedented detail one of the most confounding questions in American racial practice when to speak about people in racial terms Viewing race talk through the lens of a California high school and district Colormute draws on three years of ethnographic research on everyday race labeling in education Based on the author s experiences as a teacher as well as an anthropologist it discusses the role race plays in everyday and policy talk about such familiar topics as discipline achievement curriculum reform and educational inequality

Pollock illustrates the wide variations in the way speakers use race labels. Sometimes people use them without thinking twice; at other moments they avoid them at all costs or use them only in the description of particular situations. While a major concern of everyday race talk in schools is that racial descriptions will be inaccurate or inappropriate, Pollock demonstrates that anxiously suppressing race words, being what she terms *colormute*, can also cause educators to reproduce the very racial inequities they abhor. The book assists readers in cultivating a greater understanding of the pitfalls and possibilities of everyday race talk and clarifies previously murky discussions of colorblindness. By bridging the gap between theory and practice, *Colormute* will be enormously helpful in fostering ongoing conversations about dismantling racial inequality in America.
