Accelerated Change In Fighting Poverty An Illustrated Approach:

Reducing Inequalities Rémi Genevey, R. K. Pachauri, Laurence Tubiana, 2013-01-01 The reduction of inequalities within and between countries stands as a policy goal and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio 20 Summit in 2012 The 2013 edition of A Planet for Life represents a unique international initiative grounded on conceptual and strategic thinking and most importantly empirical experiments conducted on five continents and touching on multiple realities This unprecedented collection of works proposes a solid empirical approach rather than an ideological one to inform future debate The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic political and cultural realities These systems combine technical financial legal fiscal and organizational elements with a great deal of applied expertise and are articulated within a clear well understood growth and job generating development strategy Inequality reduction does not occur by decree neither does it automatically arise through economic growth nor through policies that equalize incomes downward via ill conceived fiscal policies Inequality reduction involves a collaborative effort that must motivate all concerned parties one that constitutes a genuine political and social innovation and one that often runs counter to prevailing political and economic forces

De Gruyter Handbook of Sustainable Development and Finance Timothy Cadman, Tapan Sarker, 2022-09-19 Beginning with an exploration of the origins and evolution of sustainable development and finance this book continues with sections on public and private sector finance and investment for sustainable development climate finance and the emerging blue economy A concluding chapter incorporates the recommendations for sustainable finance going forward in the wake of the COVID 19 pandemic and escalating global environmental crisis

The Failed Welfare Revolution Brian Steensland, 2017-10-31 Today the United States has one of the highest poverty rates among the world's rich industrial democracies The Failed Welfare Revolution shows us that things might have turned out differently During the 1960s and 1970s policymakers in three presidential administrations tried to replace the nation's existing welfare system with a revolutionary program to guarantee Americans basic economic security Surprisingly from today's vantage point guaranteed income plans received broad bipartisan support in the 1960s One proposal President Nixon's Family Assistance Plan nearly passed into law in the 1970s and President Carter advanced a similar bill a few years later The failure of these proposals marked the federal government's last direct effort to alleviate poverty among the least advantaged and ironically sowed the seeds of conservative welfare reform strategies under President Reagan and beyond This episode has largely vanished from America's collective memory Here Brian Steensland tells the whole story for the first time from why such an unlikely policy idea first developed to the factors that sealed its fate His account based on extensive original research in presidential archives draws on mainstream social science perspectives that emphasize the influence of powerful stakeholder groups and policymaking institutions But Steensland also shows that some of the most potent obstacles to guaranteed income plans were

cultural Most centrally by challenging Americans longstanding distinction between the deserving and undeserving poor the plans threatened the nation s cultural political and economic status quo

Confronting Suburban Poverty in America Elizabeth Kneebone,Alan Berube,2014-01-13 It has been nearly a half century since President Lyndon Johnson declared war on poverty Back in the 1960s tackling poverty in place meant focusing resources in the inner city and in rural areas The suburbs were seen as home to middle and upper class families affluent commuters and homeowners looking for good schools and safe communities in which to raise their kids But today s America is a very different place Poverty is no longer just an urban or rural problem but increasingly a suburban one as well In Confronting Suburban Poverty in America Elizabeth Kneebone and Alan Berube take on the new reality of metropolitan poverty and opportunity in America After decades in which suburbs added poor residents at a faster pace than cities the 2000s marked a tipping point Suburbia is now home to the largest and fastest growing poor population in the country and more than half of the metropolitan poor However the antipoverty infrastructure built over the past several decades does not fit this rapidly changing geography As Kneebone and Berube cogently demonstrate the solution no longer fits the problem The spread of suburban poverty has many causes including shifts in affordable housing and jobs population dynamics immigration and a struggling economy The phenomenon raises several daunting challenges such as the need for more and better transportation options services and financial resources But necessity also produces opportunity in this case the opportunity to rethink and modernize services structures and procedures so that they work in more scaled cross cutting and resource efficient ways to address widespread need This book embraces that opportunity Kneebone and Berube paint a new picture of poverty in

America as well as the best ways to combat it. *Confronting Suburban Poverty in America* offers a series of workable recommendations for public, private and nonprofit leaders seeking to modernize poverty alleviation and community development strategies and connect residents with economic opportunity. The authors highlight efforts in metro areas where local leaders are learning how to do more with less and adjusting their approaches to address the metropolitan scale of poverty, for example integrating services and service delivery, collaborating across sectors and jurisdictions and using data driven and flexible funding strategies. We believe the goal of public policy must be to provide all families with access to communities whether in cities or suburbs that offer a high quality of life and solid platform for upward mobility over time. Understanding the new reality of poverty in metropolitan America is a critical step toward realizing that goal.

Chapter One: The Handbook of Community Practice Marie Weil, Michael S. Reisch, Mary L. Ohmer, 2013. Written by some of the most influential scholars in the field, this Handbook covers community development, organizing, planning and social change as well as key issues, fields of practice and global approaches.

Social Dimensions of Climate Change Robin Mearns, Andrew Norton, 2009-12-02. While major strides have been made in the scientific understanding of climate change, much less understood is how these dynamics in the physical environment interact with socioeconomic systems. This book brings together the latest knowledge on the consequences of climate change for society and how best to address them.

Managing Adaptation to Climate Risk Geoff O'Brien, Phil O'Keefe, 2013-07-24. Climate change is the single largest threat to the attainment of the Millennium Development Goals (MDGs) and sustainable development. Addressing climate risk is a challenge for all. This book calls for greater collaboration between climate communities and disaster development communities. In discussing this, the book will evaluate the approaches used by each community to reduce the adverse effects of climate change. One area that offers some promise for bringing together these communities is through the concept of resilience. This term is increasingly used in each community to describe a process that embeds capacity to respond to and cope with disruptive events. This emphasizes an approach that is more focused on pre-event planning and using strategies to build resilience to hazards in an adaptation framework. The book will conclude by evaluating the scope for a holistic approach where these communities can effectively contribute to building communities that are resilient to climate driven risks.

Why Are We Waiting? Nicholas Stern, 2016-07-29. An urgent case for climate change action that forcefully sets out in economic, ethical and political terms the dangers of delay and the benefits of action. The risks of climate change are potentially immense. The benefits of taking action are also clear: we can see that economic development, reduced emissions and creative adaptation go hand in hand. A committed and strong low carbon transition could trigger a new wave of economic and technological transformation and investment, a new era of global and sustainable prosperity. Why then are we waiting? In this book, Nicholas Stern explains why, notwithstanding the great attractions of a new path, it has been so difficult to tackle climate change effectively. He makes a compelling case for climate action now and sets out the forms that action should take.

Stern argues that the risks and costs of climate change are worse than estimated in the landmark Stern Review in 2006 and far worse than implied by standard economic models. He reminds us that we have a choice: We can rely on past technologies, methods and institutions, or we can embrace change, innovation and international collaboration. The first might bring us some short-term growth but would lead eventually to chaos, conflict and destruction. The second could bring about better lives for all and growth that is sustainable over the long term and help win the battle against worldwide poverty. The science warns of the dangers of neglect; the economics and technology show what we can do and the great benefits that will follow an examination of the ethics points strongly to a moral imperative for action. Why are we waiting?

Asia and the Pacific Regional Overview of Food Security and Nutrition 2019 Food and Agriculture Organization of the United Nations, United Nations International Children's Emergency Fund, World Food Program, World Health Organization, 2019-12-11

Asia Pacific is home to well over half of all people worldwide who do not obtain sufficient dietary energy to maintain normal, active, healthy lives. To achieve SDG 2 in the region, more than 3 million people must escape hunger each month from now until December 2030. In most countries in the region, the diets of more than half of all very young children aged 6-23 months fail to meet minimum standards of diversity, leading to micronutrient deficiencies that affect child development and therefore the potential of future generations. The high prevalence of stunting and wasting among children under five years of age is a result of these deficiencies. Only four countries in the region are on track to meet the global target of a 40 percent reduction in the number of stunted children between 2012 and 2025. At the same time, the prevalence of overweight and obesity is rising steadily among children and adults, negatively affecting health and well-being. Addressing the resultant burden of diet-related non-communicable diseases places great strain on national healthcare budgets and also causes productivity losses. Social protection is an important way of reducing inequality and mitigating the impacts of disasters, and it is expanding in the region. A special section of this report discusses how to develop social protection programmes that accelerate progress in eradicating hunger and malnutrition.
