Back To Earth Tomorrows Environmentalism:

Back to Earth Anthony Weston,1994 In the face of our receding connection to nature and the loss of our direct experience of the world this book proposes a different kind of environmentalism It argues that we must restore our link with the more than human world bringing wilderness animals and the Earth closer to individuals and into daily life *Raising the Dust* Theresa Jones,2018-04-19 Raising the Dust explores the relationship between human and ecological health through the lens of African traditional medicine as practiced in the south of Malawi The book employs an ethnographic methodology using the primary methods of semi structured interviews and participant observation The fieldwork for the research was conducted in the Mulanje Mountain Biosphere and the findings are presented as a narrative exploration of insider and outsider positions in this context The conceptual framework for the book encompasses a broad range of ecological ideas focussing mainly on traditional ecological knowledge and radical ecology The holistic theoretical framework for the book emerges in a grounded way from out of the fieldwork experience The book is written in plain language and will appeal to anyone interested in holistic health outlooks particularly cross cultural health and wellbeing narratives *Skeptical Environmentalism* Robert Joseph Kirkman,2002-02-01 In Skeptical Environmentalism Robert Kirkman raises doubts about the speculative tendencies elaborated in environmental ethics deep ecology social ecology postmodern ecology ecofeminism and environmental pragmatism Drawing on skeptical principles introduced by David Hume Kirkman takes issue with key tenets of speculative environmentalism namely that the natural world is fundamentally relational that humans have a moral obligation to protect the order of nature and that understanding the relationship between nature and humankind holds the key to solving the environmental crisis Engaging the work of Kant Hegel Descartes Rousseau and Heidegger among others Kirkman reveals the relational worldview as an unreliable basis for knowledge and truth claims and more dangerously as harmful to the intellectual sources from which it takes inspiration Exploring such themes as the way knowledge about nature is formulated what characterizes an ecological worldview how environmental worldviews become established and how we find our place in nature Skeptical Environmentalism advocates a shift away from the philosopher s privileged position as truth seeker toward a more practical thinking that balances conflicts between values and worldviews **Only the Sacred** Peggy Whalen-Levitt,2011-09 The materialist philosophy that has dominated Western civilization for the past four hundred years is coming to an end In Only the Sacred Transforming Education in the Twenty first Century we are introduced to a new vision of reality where we sense a more profound world within the material world we know so well In this remarkable collection of articles originally published in Chrysalis a publication of the Center for Education Imagination and the Natural World we journey with twenty three educators through an exploration of fundamental questions of our time a path of inner schooling for educators and practices where a new understanding of a sacred universe is actualized in diverse educational settings Inspired by the mentoring of Thomas Berry this collection makes it clear that the depth and fullness of the universe

from the stars in the heavens to the dirt beneath our feet cannot be known by the intellect alone Only a sense of the sacred deep within the human soul will reveal the whole

Being Animal Anna Peterson, 2013-05-21 For most people animals are the most significant aspects of the nonhuman world They symbolize nature in our imaginations in popular media and culture and in campaigns to preserve wilderness yet scholars habitually treat animals and the environment as mutually exclusive objects of concern Conducting the first examination of animals place in popular and scholarly thinking about nature Anna L Peterson builds a nature ethic that conceives of nonhuman animals as active subjects who are simultaneously parts of both nature and human society Peterson explores the tensions between humans and animals nature and culture animals and nature and domesticity and wildness She uses our intimate connections with companion animals to examine nature more broadly Companion animals are liminal creatures straddling the boundary between human society and wilderness revealing much about the mutually constitutive relationships binding humans and nature together Through her paradigm shifting reflections Peterson disrupts the artificial boundaries between two seemingly distinct categories underscoring their fluid and continuous character

Political Nature John M. Meyer, 2001-07-20 Concern over environmental problems is prompting us to reexamine established thinking about society and politics The challenge is to find a way for the public's concern for the environment to become more integral to social economic and political decision making Two interpretations have dominated Western portrayals of the nature politics relationship what John Meyer calls the dualist and the derivative The dualist account holds that politics and human culture in general is completely separate from nature The derivative account views Western political thought as derived from conceptions of nature whether Aristotelian teleology the clocklike mechanism of early modern science or Darwinian selection Meyer examines the nature politics relationship in the writings of two of its most pivotal theorists Aristotle and Thomas Hobbes and of contemporary environmentalist thinkers He concludes that we must overcome the limitations of both the dualist and the derivative interpretations if we are to understand the relationship between nature and politics Human thought and action says Meyer should be considered neither superior nor subservient to the nonhuman natural world but interdependent with it In the final chapter he shows how struggles over toxic waste dumps in poor neighborhoods land use in the American West and rainforest protection in the Amazon illustrate this relationship and point toward an environmental politics that recognizes the experience of place as central

A Foucault for the 21st Century Sam Binkley, Jorge Capetillo-Ponce, 2009-01-23 How relevant is Foucault's social thought to the world we inhabit today This collection comprises several essays considering the contemporary relevance of the work of Michel Foucault While Foucault is best remembered for his historical inquiries into the origins of disciplinary society in a period extending from the 16th to the 19th centuries it seems that today under the conditions of global modernity the relevance of his ideas are called into question With the increasing ubiquity of markets the break up of centralized states and the dissolution of national boundaries together with new scientific and political discourses on biological life the world of today seems far removed from

the bounded disciplinary societies Foucault described in his most famous books Yet in recent years it has become apparent that Foucault's thoughts on modern society have not been exhausted and indeed that much remains to be explored Within this volume novel interpretations and thematic developments of key Foucauldian concepts are presented in the works of 24 authors Prominent among them are new forms of neoliberal economic conduct framed by distinct governmentalities new critical concepts of biological life reflected in Foucault's analysis of biopower and new theoretical treatments of the effects of subjectivation Moreover included among these theoretical departures are empirical studies of contemporary formations of religion and spiritual practice consumerism race and racism the discourse of genetics and the life sciences surveillance and incarceration and new social movements Drawn from a conference held at the University of Massachusetts Boston bearing the same title *A Foucault for the 21st Century Governmentality Biopolitics and Discipline in the New Millennium* both expands our understanding of Foucault's central theoretical legacy and applies his ideas to a range of contemporary empirical phenomena

Everyday Ethics and Social Change Anna Lisa Peterson, 2009 Americans increasingly cite moral values as a factor in how they vote but when we define morality simply in terms of a voter's position on gay marriage and abortion we lose sight of the ethical decisions that guide our everyday lives In our encounters with friends family members nature and nonhuman creatures we practice a nonutilitarian morality that makes sacrifice a rational and reasonable choice Recognizing these everyday ethics Anna L Peterson argues helps us move past the seemingly irreconcilable conflicts of culture and refocus on issues that affect real social change Peterson begins by divining a second language for personal and political values a vocabulary derived from the loving and mutually beneficial relationships of daily life Even if our interactions with others are fleeting and fragmentary they provide a viable alternative to the contractual and atomistic attitudes of mainstream culture Everyday ethics point toward a more just humane and sustainable society and to acknowledge moments of grace in our daily encounters is to realize a different way of relating to people and nonhuman nature an alternative ethic to cynicism and rank consumerism In redefining the parameters of morality Peterson enables us to make fundamental problems such as the distribution of wealth the use of public land and natural resources labor and employment policy and the character of political institutions the preferred focus of debate and action

The Greening of Everyday Life John M. Meyer, Jens Kersten, 2016-09-05 *The Greening of Everyday Life* develops a distinctive new way of talking about environmental concerns in post industrial society It brings together several conceptual frameworks with a diversity of case studies and practical examples of efforts to orient everyday material practices toward greater sustainability The volume builds upon internal criticisms of dominant strands of contemporary environmentalism in post industrial societies and develops a new approach which emerges from a number of disciplines but is unified by a normative concern for the material objects and practices familiar to members of societies in their everyday lives In exploring alternatives the chapter authors utilize conceptual frameworks rooted in environmental justice new materialism and social practice theory and apply it to the

everyday attention to urban biodiversity infrastructure for storm water run off green home remodelling household toxicity community gardens and farmers markets bicycling and automobility alternative technologies and more With contributions from leading international and emerging scholars this volume critically explores specific strategies and actions taken to generate homes communities and livelihoods that might be scaled up to promote more sustainable societies **Ecological Ethics** Patrick Curry, 2006 Taking issue with the common assumption that human ethics can be extended to meet the demands of the ongoing ecological crisis Curry demonstrates that a new and truly ecological ethic is both possible and urgently needed
