Bad Education Debunking Myths In Education:

Bad Education: Debunking Myths in Education Philip Adey, Justin Dillon, 2012-10-16 This is an important and welcome book. Readers can see the faults of simplistic judgments, neglect of evidence, dismissal of researchers and injudicious implementation. From the foreword by Paul Black: We all know that small classes are better than large classes, that children are best taught in groups according to their ability, that some schools are much better than others, and that we should teach children according to their individual learning styles, or do we? This book asks awkward questions about these and many other sacred cows of education. Each chapter tackles a persistent myth in education, confronting it with research evidence and teasing out any kernel of truth which may underlie the myth. Leading authors from the world of education each bring analysis and expertise to bear on their chosen subject, presenting their argument in an accessible manner based on sound scholarship. Some of the conclusions drawn in *Bad Education* are likely to be real eye openers for many teachers and parents who will find some of their basic assumptions about education called into question. It is also essential reading for anyone involved in educational policy making or management. Contributors: Philip Adey, Mike Anderson, Ed Baines, Paul Black, Peter Blatchford, Margaret Brown, Guy Claxton, Frank Coffield, Justin Dillon, Julian Joe Elliott, Simon Gibbs, Jeremy Hodgson, Neil Humphrey, Annette Karmiloff-Smith, Bill Lucas, Bethan Marshall, Brian Matthews, Corinne Reid, Rob Webster, Dylan Wiliam. As education policymakers, it can be difficult to resist the comfort of our own experience and gut instincts, or the lure of populism. *Bad Education* is an invaluable myth buster that tears down common misconceptions and serves up hard facts in their place. This is a politically unpalatable guide to the evidence that will challenge policymakers, the press, and parents alike. Dale Bassett, Head of Public Policy, AQA. This book should become a manifesto for change for all of those in education who want to ensure our children do not receive a *Bad Education*. Every Headteacher should buy a copy for every teacher, and hopefully somebody might even place a copy under the Secretary of State's Xmas tree. Gary Phillips, Head Teacher, Lilian Bayliss School. This is a welcome and important book. It takes apart the myths which support the dearly held convictions, simplistic assumptions, prejudices, and irrational certainties of both politicians and teachers. Admitting that education is not itself a science, but demonstrating how both neuroscience and psychology have become available to inform educational policy and practice, it should provide food for more careful and well-informed thought to all who can influence what happens in our schools. Baroness Perry of Southwark. *Bad Education: Debunking Myths In Education* Adey, Philip, Dillon, Justin, 2012-10-01. As Ben Goldacre's Guardian *Bad Science* column debunks popular scientific myths, this book aims to do the same for education myths and unjustified claims. [Educational Trends Exposed](#) David Armstrong, Gill Armstrong, 2021-12-30. *Educational Trends Exposed* explains and critically reviews eighteen of the most prevalent trends sweeping schools, colleges, and universities over the last decade and beyond. Amid the buzz from news outlets, websites, and social media peddling this works, approaches, and quick fix solutions, this book provides educators with a practical tool to help answer important questions such

as what does this trend actually involve Is it worth the investment of time and resources Does it work what does research say Do the claimed benefits to students outweigh any downsides In this timely book David Armstrong and Gill Armstrong cast a critical expert eye over these trends referencing the latest research and offering a framework for considering educational trends empowering readers as informed critical consumers They argue that trends disclose deeper truths about the state and direction of contemporary public education in Australia England and the US and provide original thought provoking analysis This book demonstrates that a greater understanding of trends can teach some important lessons including how parents teachers and educational decisions makers can agitate and collaborate for a modernised and more socially equitable education system Educational Trends Exposed is essential reading for pre and in service teachers and all educational decision makers who are faced with a choice of which trend if any to follow
