CLIMATE CHANGE-A VERY SHORT INTRODUCTION. M. MASLIN, 2022 Climate Mark Maslin, 2013-06-27 In this wide ranging *Very Short Introduction to climate* Mark Maslin considers all aspects of the global climate system exploring and explaining the different components that control climate on Earth. He considers the processes that allow energy to reach the Earth and how it is redistributed around the planet by the ocean-atmosphere system, the relationship and differences between climate and the weather, how climate has affected life on Earth and human settlements and the cyclic and quasi-cyclic features of climate such as the Milankovitch cycles and El Niño. He concludes by touching on the issue of climate change and outlines some of the approaches that are now being taken to tackle it.

Handbook of Climate Change Mitigation and Adaptation Maximilian Lackner, Baharak Sajjadi, Wei-Yin Chen, 2025-09-26 Now in its 4th extended edition, this completely revised and significantly expanded handbook addresses important new research findings and the global need for action related to climate change in its two most relevant aspects: mitigation and adaptation. There is a growing consensus that anthropogenic activities have been driving global climate change and the consequence will be catastrophic for civilization. Reducing the 37.1 billion metric tons of CO₂ produced annually in 2017, global emissions along with other greenhouse gases, particularly methane, has become a leading grand challenge and the pursuit of sustainable energy environments and economies is a complex issue affecting the daily life of every citizen. In this 4th edition, readers will find new chapters covering the causes and impacts of global warming, the climate change impacts on health, biodiversity and the economy, and emerging technologies for climate change mitigation. Particular attention is given to topics such as wildfire threats, ocean acidification, coral bleaching, sea level rise and permafrost thaw. The latest research on sustainable aviation fuels, carbon mineralization and smart cities is also covered in this new edition, as well as topics like sustainable building design, climate-resistant building materials and sustainable agriculture. *The Handbook of Climate Change Mitigation and*

Adaptation collates information in this multi disciplinary area providing readers with a comprehensive overview of the scientific background and current and emerging technologies Intended for an interdisciplinary global audience of researchers and decision makers at universities and in industry it covers climate change models established mature and promising future technologies and ideas the impact of climate change strategies for dealing with global warming the related political frameworks and climate education The Anthropology of Climate Change Hans Baer, Merrill Singer, 2014-04-24 In addressing the urgent questions raised by climate change this book provides a comprehensive overview of the anthropology of climate change guided by a critical political ecological framework It argues that anthropologists must significantly expand their focus on climate change and their contributions to responding to climate change as a grave risk to humanity The book presents a human socioecological framework for conceptualizing climate change It examines the emergence and slow maturation of the anthropology of climate change reviews the historic foundations for this work in the archaeology of climate change and presents three alternative contemporary theoretical perspectives in the anthropology of climate change The book synthesizes anthropological work and perspectives on climate change in the form of case studies in various regions of the world revealing the nature of global climate change as constituting multiple and somewhat diverse changes in local settings It explores the applied anthropology of climate change in terms of the ways anthropologists are contributing to climate policy working with communities on climate change issues as well as within the climate movement both internationally and nationally Finally it provides an overview of what other the social sciences are saying about climate change and explores ways that the anthropology of climate change can interface with sociology political science and human geography in order to create an integrated social science of climate change This book gives researchers and students in Environmental Anthropology Climate Change Human Geography and Sociology a novel framework for understanding climate change that emphasizes human socioecological interactions **Climate Change** United Library, 2021-03-15 Climate change is affecting every country on every continent It is disrupting national economies and affecting lives Weather patterns are changing sea levels are rising and weather events are becoming more extreme Although greenhouse gas emissions are projected to drop about 6 per cent in 2020 due to travel bans and economic slowdowns resulting from the COVID 19 pandemic this improvement is only temporary Climate change is not on pause Once the global economy begins to recover from the pandemic emissions are expected to return to higher levels Saving lives and livelihoods requires urgent action to address both the pandemic and the climate emergency This is the descriptive introduction to climate change Job Corps, Climate Change, Curriculum and Activity Guide-Module 1, September 2010 ,2011
