The Freudian Slip Sebastiano Timpanaro,2011-01-10 Philology cross examines Freud in this sustained critique of psychoanalysis and its foundational notion of the slip Challenging virtually every account of linguistic error in Freud s work as arbitrary and constrained Sebastiano Timpanaro advances an alternative picture keyed to the dynamics of banalization disimprovement and contextual play borrowed from the field of literary criticism Underscored with a Marxist defense of science against the professed materialism of the psychoanalytic individual drama Timpanaro s analysis demands a strong reassessment of the Freudian legacy and a renewed debate over its value for the Left

Psychosis Jozef Corveleyn,Paul Moyaert,2003 These days a book on psychosis composed entirely of psychoanalytic contributions is a rarity It can create surprise that in what some have called the decade of the brain scholars on psychoanalysis psychiatry and psychology still continue to develop a project of understanding and explaining psychosis from a phenomenological and psychodynamic perspective And yet such a project not only continues to exist in spite of the dominance of the neuro biological model but elaborates itself self consciously in contradistinction to and even as a corrective to this model The contributors to this publication share the following concern The present day biologisation and neurologisation of psychiatry has dangerously de emphasized the concern with the individual suffering soul with the psyche in psychiatry But if this means a gain in the scientific status of psychiatry it is at the same time a loss for patients and practitioners alike Most of the contributions made to this volume build globally on the ideas of De Waelhens known for his studies in phenomenology on Heidegger and Merleau Ponty as well as for his phenomenological and psychoanalytical research in psychosis The limits of phenomenology as formulated by De Waelhens in the last chapter of his *La philosophie et les experiences naturelles* 1961 incited him to broaden the scope of his perspective to unravel the basic existential structures to Dasein it is necessary to study human existence in

its vulnerability and it is exactly this vulnerability that breaks through in phenomena such as schizophrenia and paranoia
